Coffee is a beverage brewed from roasted, ground coffee beans. Darkly colored, bitter, and slightly acidic, coffee has a stimulating effect on humans, primarily due to its caffeine content, but decaffeinated coffee is also commercially available. There are also various coffee substitutes.

Coffee production begins when the seeds from coffee cherries (the *Coffea* plant's fruits) are separated to produce unroasted green coffee beans. The "beans" are roasted and then ground into fine particles. Coffee is brewed from the ground roasted beans, which are typically steeped in hot water before being filtered out. It is usually served hot, although chilled or iced coffee is common. Coffee can be prepared and presented in a variety of ways (e.g., espresso, French press, caffè latte, or already-brewed canned coffee). Sugar, sugar substitutes, milk, and cream are often added to mask the bitter taste or enhance the flavor.

Though coffee is now a global commodity, it has a long history tied closely to food traditions around the Red Sea. Credible evidence of coffee drinking as the modern beverage subsequently appears in modern-day Yemen in southern Arabia in the middle of the 15th century in Sufi shrines, where coffee seeds were first roasted and brewed in a manner similar to how it is now prepared for drinking. The coffee beans were procured by the Yemenis from the Ethiopian Highlands via coastal Somali intermediaries, and cultivated in Yemen. By the 16th century, the drink had reached the rest of the Middle East and North Africa, later spreading to Europe.

The two most commonly grown coffee bean types are *C. arabica* and *C. robusta*. Coffee plants are cultivated in over 70 countries, primarily in the equatorial regions of the Americas, Southeast Asia, the Indian subcontinent, and Africa. Green, unroasted coffee is traded as an agricultural commodity. The global coffee industry is worth \$495.50 billion, as of 2023. In 2023, Brazil was the leading grower of coffee beans, producing 31% of the world's total, followed by Vietnam. While coffee sales reach billions of dollars annually worldwide, coffee farmers disproportionately live in poverty. Critics of the coffee industry have also pointed to its negative impact on the environment and the clearing of land for coffee-growing and water use.

Singlish is the English-based creole or patois spoken colloquially in Singapore. English is one of Singapore's official languages, along with Malay (which is also the National Language), Mandarin, and Tamil. Although English is the lexifier language, Singlish has its unique slang and syntax, which are more pronounced in informal speech. It is usually a mixture of English, Hokkien, Cantonese, Malay, and Tamil, and sometimes other Chinese languages like Teochew, Hainanese, Hakka, Hockchew, and Mandarin. For example, *pek chek* means to be annoyed or frustrated, and originates from Singaporean Hokkien ?? (POJ: *pek-chhek*). It is used in casual contexts between Singaporeans, but is avoided in formal events when certain Singlish phrases may be considered unedifying. Singapore English can be broken into two subcategories: Standard Singapore English (SSE) and Colloquial Singapore English (CSE) or Singlish as many locals call it. The relationship between SSE and Singlish is viewed as a diglossia, in which SSE is restricted to be used in situations of

formality where Singlish/CSE is used in most other circumstances.

Some of the most popular Singlish terms have been added to the Oxford English Dictionary (OED) since 2000, including wah, sabo, lepak, shiok and hawker centre. On 11 February 2015, kiasu was chosen as OED's Word of the Day.
