Orthogonal group

In mathematics, the orthogonal group in dimension n , denoted $O(n)$, is the group of distance-preserving transformations of a Euclidean space of dimension n that preserve a fixed point, where the group operation is given by composing transformations. The orthogonal group is sometimes called the general orthogonal group, by analogy with the general linear group. Equivalently, it is the group of $n \times n$ orthogonal matrices, where the group operation is given by matrix multiplication (an orthogonal matrix is a real matrix whose inverse equals its transpose). The orthogonal group is an algebraic group and a Lie group. It is compact.

The orthogonal group in dimension n has two connected components. The one that contains the identity element is a normal subgroup, called the special orthogonal group, and denoted $SO(n)$. It consists of all orthogonal matrices of determinant 1. This group is also called the rotation group, generalizing the fact that in dimensions 2 and 3, its elements are the usual rotations around a point (in dimension 2) or a line (in dimension 3). In low dimension, these groups have been widely studied, see $SO(2)$, $SO(3)$ and $SO(4)$. The other component consists of all orthogonal matrices of determinant -1 . This component does not form a group, as the product of any two of its elements is of determinant 1, and therefore not an element of the component.

By extension, for any field F , an $n \times n$ matrix with entries in F such that its inverse equals its transpose is called an orthogonal matrix over F . The $n \times n$ orthogonal

matrices form a subgroup, denoted $O(n, F)$, of the general linear group $GL(n, F)$; that is

More generally, given a non-degenerate symmetric bilinear form or quadratic form on a vector space over a field, the orthogonal group of the form is the group of invertible linear maps that preserve the form. The preceding orthogonal groups are the special case where, on some basis, the bilinear form is the dot product, or, equivalently, the quadratic form is the sum of the square of the coordinates.

All orthogonal groups are algebraic groups, since the condition of preserving a form can be expressed as an equality of matrices.

.so

.edu.so for higher education institutions; .gov.so for government entities; .sch.so for schools; and .gm.so, .hs.so, .jl.so, .pl.so, and .sw.so for Galmudug

.so is the internet country code top-level domain (ccTLD) for Somalia. After a long absence, the .so domain was officially relaunched on November 1, 2010, by .SO Registry, which is regulated by the nation's Ministry of Posts and Telecommunications. It was launched through various accredited registrars around the world.

On 11 July 2013 the ISO 3166-1 code for Somalia changed to reflect the SO used for the ccTLD.

On July 8, 2015, the .so ccTLD registry was transferred to the Somali Network Information Center (SONIC), which introduced new limitations on purchasing .so domain names by persons and organizations not affiliated with Somalia. As a result, several registrars suspended the registration of new .so domain names.

On March 9, 2018, Somalia's newly established telecom regulator The National Communications Authority (NCA) took full control of the country's top-level internet domain (dotSO) from the Somali National Information Center (SONIC) and Cloudy Registry, who ran the operations and the management of the domain Registry.

So Far, So Good... So What! is the third studio album by American thrash metal band Megadeth, released on January 19, 1988, by Capitol Records. It was the band's only album recorded with drummer Chuck Behler and guitarist Jeff Young, both of whom were fired from the band in early 1989, several months after the completion of the album's world tour. So Far, So Good... So What! features music performed at fast tempos with technical ability; lyrically, frontman and guitarist Dave Mustaine addresses a variety of topics, including nuclear holocaust and freedom of speech.

So Far, So Good... So What! was well received by critics upon its release, although retrospective analysis has been less favorable. It managed to enter the top-thirty of the Billboard 200 (although it received no commercial radio play), and charted in several other countries as well. The album was eventually certified platinum by the RIAA, and indicated Megadeth's forthcoming emergence from the underground music scene.

Su From So is a 2025 Indian Kannada-language comedy drama film written and directed by J. P. Thuminad in his directorial debut and is produced by Shashidhar Shetty Baroda, Ravi Rai Kalasa, and Raj B. Shetty under Lighter Buddha Films. It stars Shaneel Gautham, J. P. Thuminad, Sandhya Arakere, Prakash Thuminad, Deepak Rai Panaje, Mime Ramdas and Raj B. Shetty.

Set in the coastal village of Marlur linked to Someshwara, the story follows Ashoka, a carefree young man whose innocent crush spirals into rumours of possession by a ghost named Sulochana, upending village life through a cascade of comedic supernatural events.

The film was released theatrically on 25 July 2025. Upon release, it received overwhelmingly positive reviews and became a commercial success. It is also the highest-grossing Kannada film of the year at the time of release. It was credited with bringing back large footfalls in Kannada cinema after Raajakumara (2017), KGF Series (2018–2022), Kantara (2022) and 777 Charlie (2022).
