29 (twenty-nine) is the natural number following 28 and preceding 30. It is a prime number.

29 is the number of days February has on a leap year.

Mikoyan MiG-29

The Mikoyan MiG-29 (Russian: ?????? ???-29; NATO reporting name: Fulcrum) is a twin-engine fighter aircraft designed in the Soviet Union. Developed by

The Mikoyan MiG-29 (Russian: ?????? ???-29; NATO reporting name: Fulcrum) is a twin-engine fighter aircraft designed in the Soviet Union. Developed by the Mikoyan design bureau as an air superiority fighter during the 1970s, the MiG-29, along with the larger Sukhoi Su-27, was developed to counter U.S. fighters such as the McDonnell Douglas F-15 Eagle and the General Dynamics F-16 Fighting Falcon. The MiG-29 entered service with the Soviet Air Forces in 1983.

While originally oriented towards combat against any enemy aircraft, many MiG-29s have been furnished as multirole fighters capable of performing a number of different operations, and are commonly outfitted to use a range of air-to-surface armaments and precision munitions. The MiG-29 has been manufactured in several major variants, including the multirole Mikoyan MiG-29M and the navalised Mikoyan MiG-29K; the most advanced member of the family to date is the Mikoyan MiG-35. Later models frequently feature improved engines, glass cockpits with HOTAS ("hands-on-throttle-and-stick")-compatible flight controls, modern radar and infrared search and track (IRST) sensors, and considerably increased fuel capacity; some aircraft have also been equipped for aerial refueling.

Following the dissolution of the Soviet Union, the militaries of multiple ex-Soviet republics have continued to operate the MiG-29, the largest of them being the Russian Aerospace Forces. The Russian Aerospace Forces wanted to upgrade its existing fleet to the modernised MiG-29SMT configuration, but financial difficulties have limited deliveries. The MiG-29 has also been a popular export aircraft; more than 30 nations either operate or have operated the aircraft. As of 2024 Flight Global estimates that 809 MiG-29s, of all types, are in service with air forces, making it the 5th most common active fighter.

Premier League

Retrieved 29 May 2023. Hafez, Shamoon (28 May 2023). "What went wrong for Leicester City?". BBC Sport. Archived from the original on 29 May 2023. Retrieved

The Premier League is a professional association football league in England and the highest level of the English football league system. Contested by 20 clubs, it operates on a system of promotion and relegation with the English Football League (EFL). Seasons usually run from August to May, with each team playing 38 matches: two against each other team, one home and one away. Most games are played on weekend afternoons, with occasional weekday evening fixtures.

The competition was founded as the FA Premier League on 20 February 1992, following the decision of clubs from the First Division (the top tier since 1888) to break away from the English Football League. Teams are still promoted and relegated to and from the EFL Championship each season. The Premier League is a corporation managed by a chief executive, with member clubs as shareholders. The Premier League takes advantage of a £5 billion domestic television rights deal, with Sky and BT Group broadcasting 128 and 32 games, respectively. This will rise to £6.7 billion from 2025 to 2029. In the 2022–2025 cycle, the Premier League earned a record £5.6 billion from international rights. As of 2023–24, Premier League clubs received central payments totalling £2.8 billion, with additional solidarity payments made to relegated EFL clubs.

The Premier League is the most-watched sports league in the world, broadcast in 212 territories to 643 million homes, with a potential TV audience of 4.7 billion people. As of the 2024–25 season, the Premier League has the highest average and aggregate match attendance of any association football league in the world, at 40,421 per game. Most stadiums operate close to full capacity. The Premier League is currently ranked first in the UEFA coefficient rankings based on performances in European competitions over the past five seasons, ahead of Italy's Serie A. The English top-flight has produced the second-highest number of European Cup / UEFA Champions League titles, with a record six English clubs having won fifteen European cups in total.

Fifty-one clubs have competed in the Premier League since its inception in 1992: 49 from England and two from Wales. Seven have won the title: Manchester United (13), Manchester City (8), Chelsea (5), Arsenal (3), Liverpool (2), Blackburn Rovers (1) and Leicester City (1). Only six clubs have played in every season to date: Arsenal, Chelsea, Everton, Liverpool, Manchester United, and Tottenham Hotspur.

February 29 is a leap day (or "leap year day")—an intercalary date added periodically to create leap years in the Julian and Gregorian calendars. It is the 60th day of a leap year in both Julian and Gregorian calendars, and 306 days remain until the end of the leap year. It is the last day of February in leap years only. It is also the last day of meteorological winter in the Northern Hemisphere and the last day of meteorological summer in the Southern Hemisphere in leap years.

In the Gregorian calendar, the standard civil calendar used in most of the world, February 29 is added in each year that is an integer multiple of four, unless it is evenly divisible by 100 but not by 400. For example, 1900 was not a leap year, but 2000 was. The Julian calendar—since 1923 a liturgical calendar—has a February 29 every fourth year without exception. Consequently, February 29 in the Julian calendar, since 1900, falls 13 days later than February 29 in the Gregorian, until the year 2100.

The convention of using February 29 was not widely accepted before the 15th century; from Julius Caesar's edict in 45 BC until the 16th century (formally), February 24 was doubled instead. In one of its attempts to adopt the Gregorian calendar, Sweden tried (unsuccessfully) to phase in the change by omitting leap days in the 11 successive leap-years, 1700–1740.

July 29

July 29 is the 210th day of the year (211th in leap years) in the Gregorian calendar; 155 days remain until the end of the year. 587 BC – The Neo-Babylonian

July 29 is the 210th day of the year (211th in leap years) in the Gregorian calendar; 155 days remain until the end of the year.

Hurricane Katrina

Category 5 hurricane before weakening to a Category 3 at its landfall on August 29 near Buras-Triumph, Louisiana. Eighty percent of New Orleans, as well as large

Hurricane Katrina was a powerful, devastating and historic tropical cyclone that caused 1,392 fatalities and damages estimated at \$125 billion in late August 2005, particularly in the city of New Orleans and its surrounding area. It is tied with Hurricane Harvey as being the costliest tropical cyclone in the Atlantic basin. Katrina was the twelfth tropical cyclone, the fifth hurricane, and the third major hurricane of the 2005 Atlantic hurricane season. It was also the fourth-most intense Atlantic hurricane to make landfall in the contiguous United States, gauged by barometric pressure.

Katrina formed on August 23, 2005, with the merger of a tropical wave and the remnants of a tropical depression. After briefly weakening to a tropical storm over south Florida, Katrina entered the Gulf of Mexico on August 26 and rapidly intensified to a Category 5 hurricane before weakening to a Category 3 at its landfall on August 29 near Buras-Triumph, Louisiana.

Eighty percent of New Orleans, as well as large areas in neighboring parishes, were flooded. It is estimated that about 100,000 to 150,000 people remained in the City of New Orleans, despite mandatory evacuation orders. This prompted a massive national and international response effort, including federal, local, and private rescue operations. The largest loss of life was due to flooding caused by engineering flaws in the federally built hurricane protection system, particularly the levees around New Orleans. Multiple investigations concluded that the U.S. Army Corps of Engineers, the organization tasked by Congress in the Flood Control Act of 1965 to design and build the region's hurricane protection, was responsible for the breached floodwalls. Later, a federal appeals court ruled that the Army Corps, despite being responsible, could not be held financially liable due to the Flood Control Act of 1928.

The emergency response from federal, state, and local governments was widely criticized, leading to the resignation of Federal Emergency Management Agency (FEMA) director Michael D. Brown and New Orleans Police Department (NOPD) superintendent Eddie Compass. Many other government officials faced criticism for their responses, especially New Orleans mayor Ray Nagin, Louisiana governor Kathleen Blanco, and President George W. Bush. However, several agencies, such as the United States Coast Guard (USCG), National Hurricane Center (NHC), and National Weather Service (NWS), were commended for their actions, with the NHC being particularly praised for its accurate forecasts well in advance.

The destruction and loss of life caused by the storm prompted the name Katrina to be retired by the World Meteorological Organization in April 2006. On January 4, 2023, the NHC updated the Katrina fatality data based on a 2014 report, which reduced the total number from an estimated 1,833 to 1,392.
