THE NEW YORK TIMES BESTSELLER The first inside story of one of TV's most popular and beloved dramas, *Grey's Anatomy*. More than fifteen years after its premiere, *Grey's Anatomy* remains one of the most beloved dramas on television and ABC's most important property. It typically wins its time slot and has ranked in the Top 20 most-watched shows in primetime for most of its seventeen-season run. It currently averages more than eight million viewers each week. Beyond that, it’s been a cultural touchstone. It introduced the unique voice and vision of Shonda Rhimes; it made Ellen Pompeo, Sandra Oh and T.R. Knight household names; and injected words and phrases into the cultural lexicon, such as “McDreamy,” “seriously,” and “you’re my person.” And the behind-the-scenes drama has always been just as juicy as what was happening in front of the camera, from the controversial departure of Isaiah Washington to Katherine Heigl’s fall from grace and Patrick Dempsey's shocking death episode. The show continued to hemorrhage key players, but the beloved hospital series never skipped a beat. Lynette Rice's *How to Save A Life* takes a totally unauthorized deep dive into the show’s humble start, while offering exclusive intel on the behind-the-scenes culture, the most heartbreaking departures and the more polarizing plotlines. This exhaustively enthusiastic book is one that no *Grey's Anatomy* fan should be without.

How to Save a Life

The life and career of Mr. Sherlock Holmes have inspired the interest of many of the brightest intellects in the world. They have expended great efforts to penetrate beyond the glimpses afforded us in the 60 published adventures - to detect the real underlying character of \"the best and the wisest man\" Dr. Watson has ever known (\"The Final Problem\" by A. C. Doyle). To the hundreds of past and present day Sherlockians, Holmesians, Doyeleans, we owe a great deal of gratitude for helping to shred the veil which has been created to obfuscate the real character of our remarkable hero: from the sainted Christopher Morley and Vincent Starrett; to the renowned commentators Ronald A. Knox, William S. Baring-Gould, Edgar W. Smith, Sydney C. Roberts, Michael Harrison, Michael Hardwick, and many others too numerous to mention. Commentators have included bookmen, journalists and essayists, physicians, psychiatrists and pathologists, chemists, monsignors and vicars, barristers and solicitors, and automobile executives. All have brought their intelligence, unique perspectives, and, most of all, a very desperate need for knowledge to this quest, their labor of love. With great humility but stout heart, I feel highly motivated, even obligated, to attempt to add my voice to this ongoing effort. As a microbiologist, I hope to bring a different perspective to these studies. I am used to dealing with very minute objects that produce consequences much greater than their size would indicate. Is not this obsession with minutiae the perfect training and background for one who feels the need to participate in Sherlockian studies? I do hope that this makes me somewhat qualified to join in this important area of scholarly research.

Hearings Before the President's Commission on the Assassination of President Kennedy

Coming in June 2016! Today's early literacy programs are more demanding than ever. No longer is it sufficient to teach letters, letter sounds, sight words, and simple texts in kindergarten through second grade. Children are expected to read and comprehend texts in a variety of genres with increasing complexity. Then they must integrate the ideas and concepts from those texts into their own writing. *Two Books are Better Than One: Reading and Writing (and Talking and Drawing) Across Texts in K-2* helps teachers meet those demands. Each chapter contains an anchor lesson focused on a different way of connecting texts, including: by theme, characters, perspective, structure, or genre. The lessons feature research-based and common core aligned strategies: interactive read-alouds; shared reading and writing; scaffolded small group reading; accountable talk; close reading; and opinion, narrative, and explanatory writing. Each anchor lesson features two high-quality children's books, and each chapter is rounded out with a list of other recommended book pairs to support you in creating your own lessons.

Big Book on How to Draw Animals

The city has killed most of your ancestors, and it's probably killing you, too - this book tells you why. Imagine you are a hunter-gatherer some 15,000 years ago. You've got a choice – carry on foraging, or plant a few seeds and move to one of those new-fangled settlements down the valley. What you won't know is that urban life is short and riddled with dozens of new diseases; your children will be shorter and sicklier than you are, they'll be plagued with gum disease, and stand a decent chance of a violent death at the point of a spear. Why would anyone choose this? This is one of the many intriguing questions tackled by Brenna Hassett in *Built on Bones*. Using research on skeletal remains from around the world, this book explores the history of humanity's experiment with the metropolis, and looks at why our ancestors chose city life, and why they have largely stuck to it. It explains the diseases, the deaths and the many other misadventures that we have unwittingly unleashed upon ourselves throughout the metropolitan past, and as the world becomes increasingly urbanised, what we can look forward to in the future. Telling the tale of shifts in human growth and health that have occurred as we transitioned from a mobile to a largely settled species. *Built on Bones* offers an accessible insight into a critical but relatively unheralded aspect of the human story: our recent evolution.
