Incivility

pages. Petty examples that contribute to an uncivil environment use of rudeness or profanity racial, ethnic, religious, homophobic and gender-related slurs

Incivility is behavior that creates an atmosphere of animosity and disrespect. Incivility is a source of conflict and a cause of wikistress.

The Wikipedia community has an informal hierarchy of core principles — the first being to strive for NPOV. The second simply demands a reasonable degree of civility towards others. Even if "civility" is just an informal rule, it's the only term that can apply, and it's the only reasonable way to delimit acceptable conduct from the unacceptable. We can't ask people to love, honor, obey, or even respect another, but we have every right to demand civility.

One essential definition of civility is to treat others as you would like them to treat you. However, in reality, it is not always enough just to treat people in the same way that you would have them treat you, because people may have different preferences for how they like to be treated. For this reason being civil relies on the use of empathy to realize that others may have different preferences of treatment than you do, and that a form of behavior that you might not personally find unpleasant could be experienced as unpleasant by others. Importantly, empathy includes the ability to realize that others may also have difficulties being sufficiently empathetic, and that perceived lack of civility in others does not necessarily stem from bad faith, but could come from users having different norms of behavior or personality.

Incivility is a vicious cycle because people who experience uncivil behavior from others will usually retaliate, escalating and polarizing conflicts and threatening or impeding collaboration.

Dispute resolution

Discuss disputed changes on the talk page or privately. If you encounter rude or inappropriate behavior, resist the temptation to respond unkindly, and

For the essay, see Dispute resolution (essay). For the proposed committee, see Dispute resolution committee.

In general, try to avoid heated arguments by remaining civil and seriously considering other editors' points of view. If a dispute develops, try privately talking to those involved, or spend some time away from the project to regain perspective. More specifically, see the steps below in the order they are listed.
