Kristin Denise Smart (February 20, 1977 – disappeared May 25, 1996; declared legally dead May 25, 2002) was a 19-year-old American woman murdered by Paul Flores at the end of her first year on the campus of California Polytechnic State University, San Luis Obispo (Cal Poly San Luis Obispo).

On the evening of Friday, May 24, 1996, Smart attended a fellow Cal Poly student's off-campus party. At approximately 2 a.m., she was found passed out on a neighbor's lawn, and two students began to help her

walk to her dorm room. A third student named Paul Flores joined the group, and due to the proximity of his dorm to Smart's, Flores told the other two students he would get Kristin home safely. Smart was never seen again, and searches conducted since her disappearance have not yet located her, or her remains.

Smart's disappearance resulted in state legislation, including the Kristin Smart Campus Security Act, a bill which requires all public colleges and publicly funded educational institutions in California to have their security services make agreements with local police departments about reporting cases involving or possibly involving violence against students, including missing students. The bill was passed unanimously by the California State Legislature and was signed into law by Governor Pete Wilson.

On April 13, 2021, Flores and his father, Ruben Flores, were arrested and taken into custody on suspicion of Smart's disappearance. Their homes were searched, and investigators found numerous "items of interest" in the son's home. Their trial began in July 2022. On October 18, 2022, Paul Flores was found guilty of the murder of Kristin Smart, and Ruben Flores was acquitted of 'accessory after the fact'. On March 10, 2023, Paul was sentenced to 25 years to life in prison. The trial was held in Monterey County Superior Court in Salinas, California.

The Smart Fortwo (stylized as "smart fortwo") is a two-seater city car manufactured and marketed by the Smart division of the Mercedes-Benz Group for model years 1998–2024, across three generations — each using a rear-engine, rear-wheel-drive layout and a one-box design.

The first generation was internally designated as the W450, launched at the 1998 Paris Motor Show. The second generation W451-build series was launched at the 2006 Bologna Motor Show. The third generation Fortwo (2014–2024) was internally designated as the C453 build series, and debuted globally on July 16, 2014, at the Tempodrom in Berlin along with a closely related four-door version, the Smart Forfour, co-developed and sharing the same platform and engines with the third-generation Renault Twingo.

Marketed in 46 countries worldwide, Fortwo production had surpassed 1.7 million units by early 2015.

The brand name Smart supposedly derives from its early history as a cooperative venture between Swatch and Mercedes: Swatch Mercedes ART. The Fortwo nameplate derives from its two-person seating capacity. Until 2002, the Fortwo had been marketed as the smart City-Coupé.

S.M.A.R.T. (or SMART) is an acronym used as a mnemonic device to establish criteria for effective goal-setting and objective development. This framework is commonly applied in various fields, including project management, employee performance management, and personal development. The term was first proposed

by George T. Doran in the November 1981 issue of Management Review, where he advocated for setting objectives that are specific, measurable, assignable, realistic, and time-bound—hence the acronym S.M.A.R.T.

Since its inception, the SMART framework has evolved, leading to the emergence of different variations of the acronym. Commonly used versions incorporate alternative words, including attainable, relevant, and timely. Additionally, several authors have introduced supplementary letters to the acronym. For instance, some refer to SMARTS goals, which include the element of "self-defined", while others utilize SMARTER goals.

Proponents of SMART objectives argue that these criteria facilitate a clear framework for goal setting and evaluation, applicable across various contexts such as business (between employee and employer) and sports (between athlete and coach). This framework enables the individual setting the goal to have a precise understanding of the expected outcomes, while the evaluator has concrete criteria for assessment. The SMART acronym is linked to Peter Drucker's management by objectives (MBO) concept, illustrating its foundational role in strategic planning and performance management.
