In philosophy, systems theory, science, and art, emergence occurs when a complex entity has properties or behaviors that its parts do not have on their own, and emerge only when they interact in a wider whole.

Emergence plays a central role in theories of integrative levels and of complex systems. For instance, the phenomenon of life as studied in biology is an emergent property of chemistry and physics.

In philosophy, theories that emphasize emergent properties have been called emergentism.

The 2025 Emergence was a professional wrestling event produced by Total Nonstop Action Wrestling. It took place on August 15, 2025, at Chesapeake Employers Insurance Arena in Baltimore, Maryland, and will air on TNA+. It was the sixth event under the Emergence chronology. Wrestlers from WWE's NXT brand, with which TNA has a partnership, also appeared at the event.

Ten matches were contested at the event, including two on the "Countdown to Emergence" pre-show. In the main event, NXT wrestler Trick Williams defeated Moose to retain the TNA World Championship. In other prominent matches, The Hardys (Jeff Hardy and Matt Hardy) defeated The Rascalz (Zachary Wentz and Myron Reed) to retain the TNA World Tag Team Championship, Steve Maclin defeated Jake Something in a No Disqualification, No Countout match to retain the TNA International Championship, and in the opening bout, Leon Slater defeated Cedric Alexander to retain the TNA X Division Championship.

The Gifted season 2

The second and final season of the American television series The Gifted is based on Marvel Comics' X-Men properties, and follows ordinary parents who take their family on the run after they discover their children's mutant abilities. The season is connected to the X-Men film series, set in an alternate timeline where the X-Men have disappeared. It was produced by 20th Century Fox Television in association with Marvel Television, with Matt Nix serving as showrunner.

Stephen Moyer and Amy Acker star as the parents, alongside Sean Teale, Natalie Alyn Lind, Percy Hynes White, Coby Bell, Jamie Chung, Blair Redford, and Emma Dumont. They are joined by Skyler Samuels, promoted from a recurring guest role in the first season, and Grace Byers. A second season was ordered in January 2018, and began filming that June. It depicts the different approaches to the fight for mutant civil rights that are taken by the Mutant Underground and the Hellfire Club, and also introduces the Morlocks and further explores the Purifiers—all groups originating in the comics.

The season aired between September 25, 2018 and February 26, 2019, and consisted of 16 episodes.

Alien: Earth is an American science fiction horror television series created by Noah Hawley. It is the first television series in the Alien franchise and is set two years before the events of the 1979 film Alien. The series stars Sydney Chandler, Alex Lawther, Essie Davis, Samuel Blenkin, Babou Ceesay, Adarsh Gourav, and Timothy Olyphant in main roles.

Development for the series was reported to have begun in early 2019, with Ridley Scott attached to executive produce for FX on Hulu. It had started pre-production by April 2023, with Chandler cast in the lead role the following month, and further casting taking place from July to November that year. After principal photography was delayed due to the COVID-19 pandemic, production began in July 2023 but was halted in August due to the 2023 SAG-AFTRA strike. Filming resumed in April 2024 and ended in July that year.

Alien: Earth premiered on FX and FX on Hulu in the United States and on Disney+ internationally on August 12, 2025.

"Emergence" is a song by anonymous English rock band Sleep Token. Written by the band's frontman Vessel and drummer II, it was produced by Carl Bown and released as the lead single from the band's fourth studio album Even in Arcadia on 13 March 2025, their first release for RCA Records. The track was Sleep Token's first to register on the main singles charts in both the UK and the US, reaching number 17 on the UK Singles Chart and number 57 on the US Billboard Hot 100.

Pupa

pupation, and the act of emerging from the pupal case is called eclosion or emergence. The pupae of different groups of insects have different names such as

A pupa (from Latin pupa 'doll'; pl.: pupae) is the life stage of insects from the Holometabola clade undergoing transformation between immature and mature stages. Insects that go through a pupal stage are holometabolous: they go through four distinct stages in their life cycle, the stages thereof being egg, larva, pupa, and imago. The processes of entering and completing the pupal stage are controlled by the insect's hormones, especially juvenile hormone, prothoracicotropic hormone, and ecdysone. The act of becoming a pupa is called pupation, and the act of emerging from the pupal case is called eclosion or emergence.

The pupae of different groups of insects have different names such as chrysalis for the pupae of butterflies and tumbler for those of the mosquito family. Pupae may further be enclosed in other structures such as cocoons, nests, or shells.

Origin of language

late twentieth century. Various hypotheses have been developed on the emergence of language. While Charles Darwin's theory of evolution by natural selection

The origin of language, its relationship with human evolution, and its consequences have been subjects of study for centuries. Scholars wishing to study the origins of language draw inferences from evidence such as the fossil record, archaeological evidence, and contemporary language diversity. They may also study language acquisition as well as comparisons between human language and systems of animal communication (particularly other primates). Many argue for the close relation between the origins of language and the origins of modern human behavior, but there is little agreement about the facts and implications of this connection.

The shortage of direct, empirical evidence has caused many scholars to regard the entire topic as unsuitable for serious study; in 1866, the Linguistic Society of Paris banned any existing or future debates on the subject, a prohibition which remained influential across much of the Western world until the late twentieth century. Various hypotheses have been developed on the emergence of language. While Charles Darwin's theory of evolution by natural selection had provoked a surge of speculation on the origin of language over a century and a half ago, the speculations had not resulted in a scientific consensus by 1996. Despite this, academic interest had returned to the topic by the early 1990s. Linguists, archaeologists, psychologists, and anthropologists have renewed the investigation into the origin of language with modern methods.
