At the time, it was known as the Year of the Consulship of Monaxius and Plinta (or, less frequently, year 1172 Ab urbe condita). An advance-fee scam is a form of fraud and is a common scam. The scam works by promising the victim a large sum of money in return for a small upfront payment, which the fraudster claims will be used to obtain the large sum. If a victim makes the payment, the fraudster either invents a series of further fees for the victim to pay or simply disappears.

The Federal Bureau of Investigation (FBI) states that "An advance fee scheme occurs when the victim pays money to someone in anticipation of receiving something of greater value – such as a loan, contract, investment, or gift – and then receives little or nothing in return." There are many variations of this type of scam, including the Nigerian prince scam, also known as a 419 scam. The number "419" refers to the section of the Nigerian Criminal Code dealing with fraud and the charges and penalties for such offenders. The scam has been used with fax and traditional mail and is now prevalent in online communications such as emails. Other variations include the Spanish Prisoner scam and the black money scam.

Although Nigeria is most often the nation referred to in these scams, they mainly originate in other nations. Other nations known to have a high incidence of advance-fee fraud include Ivory Coast, Togo, South Africa, the Netherlands, Spain, and Jamaica.

419 Aurelia is a main-belt asteroid that was discovered by German astronomer Max Wolf on September 7, 1896, in Heidelberg. It is classified as an F-type asteroid.

Photometric observations of this asteroid made during 2008 at the Organ Mesa Observatory in Las Cruces, New Mexico gave a "somewhat irregular" light curve with a period of  $16.784 \pm 0.001$  hours and a brightness variation of  $0.07 \pm 0.01$  in magnitude. When allowing for varying aspect angles and changes in mean motion, this result is consistent with past studies.

Manufacture took place at Daimler-Benz's Gaggenau plant in Germany, where the Unimog 419 was assembled using the Unimog 406's chassis, the Unimog 416's engine, and American-made off-the-shelf components such as the entire 24-Volt electrical system. The US Army used the Unimog 419 as a combat engineering vehicle.
