

Econometrica

Econometrica

Econometrica is a peer-reviewed academic journal of economics, publishing articles in many areas of economics, especially econometrics. It is published

Econometrica is a peer-reviewed academic journal of economics, publishing articles in many areas of economics, especially econometrics. It is published by Wiley-Blackwell on behalf of the Econometric Society. The current editor-in-chief is Marina Halac.

Frisch Medal

two years for empirical or theoretical applied research published in Econometrica during the previous five years. The award was named in honor of Ragnar

The Frisch Medal is an award in economics given by the Econometric Society. It is awarded every two years for empirical or theoretical applied research published in Econometrica during the previous five years. The award was named in honor of Ragnar Frisch, first co-recipient of the Nobel prize in economics and editor of Econometrica from 1933 to 1954. In the opinion of Rich Jensen, Gilbert F. Schaefer Professor of Economics and chairperson of the Department of Economics of the University of Notre Dame, "The Frisch medal is not only one of the top three prizes in the field of economics, but also the most prestigious 'best article' award in the profession". Five Frisch medal winners have also won the Nobel Prize.

Pradeep Dubey

theory and mathematical economics. He has published, among others, in Econometrica, Games and Economic Behavior, Journal of Economic Theory, and Quarterly

Pradeep Dubey (born 9 January 1951) is an Indian game theorist. He is a Professor of Economics at the State University of New York, Stony Brook, and a member of the Stony Brook Center for Game Theory. He also holds a visiting position at Cowles Foundation, Yale University. He did his schooling at the St. Columba's School, Delhi. He received his Ph.D. in applied mathematics from Cornell University and B.Sc. (with honors in physics) from the University of Delhi. His research areas of interest are game theory and mathematical economics. He has published, among others, in Econometrica, Games and Economic Behavior, Journal of Economic Theory, and Quarterly Journal of Economics. He is a Fellow of The Econometric Society, ACM Fellow and a member of the council of the Game Theory Society.

Econometric Society

Wiener. The Econometric Society sponsors the economics academic journal Econometrica and publishes the journals Theoretical Economics and Quantitative Economics

The Econometric Society is an international society of academic economists interested in applying statistical tools in the practice of econometrics. It is an independent organization with no connections to societies of professional mathematicians or statisticians.

It was founded on December 29, 1930, at the Statler Hotel in Cleveland, Ohio. Its first president was Irving Fisher.

As of 2014, there are about 700 elected fellows of the Econometric Society, making it one of the most prevalent research affiliations. New fellows are elected each year by the current fellows.

The sixteen founding members were Ragnar Frisch, Charles F. Roos, Joseph A. Schumpeter, Harold Hotelling, Henry Schultz, Karl Menger, Edwin B. Wilson, Frederick C. Mills, William F. Ogburn, J. Harvey Rogers, Malcolm C. Rorty, Carl Snyder, Walter A. Shewhart, Øystein Ore, Ingvar Wedervang and Norbert Wiener.

The Econometric Society sponsors the economics academic journal *Econometrica* and publishes the journals *Theoretical Economics* and *Quantitative Economics*.

Larry Samuelson

Economics, the Journal of Economic Literature, and Econometrica. He has served as a co-editor of Econometrica and the American Economic Review. "Faculty". Economics

Larry Samuelson (born April 2, 1953) is the A. Douglas Melamed Professor of Economics at Yale University and one of the faculty of the Cowles Foundation of Yale University.

Samuelson earned his B.A. in economics/political science from the University of Illinois in 1974. He continued on with the University of Illinois for both his master's degree in 1977 and his PhD in 1978—both in economics.

He has previously held faculty positions at the University of Florida, Syracuse University, Penn State and the University of Wisconsin.

He has made significant contributions to microeconomic theory and game theory. Areas of specialization include the theory of repeated games and the evolutionary foundations of economic behavior.

Samuelson has served on the editorial boards of *Games and Economic Behavior*, the *International Journal of Game Theory*, *Economic Theory*, the *Journal of Economic Theory*, *Theoretical Economics*, the *Journal of Economic Literature*, and *Econometrica*. He has served as a co-editor of *Econometrica* and the *American Economic Review*.

Jerry A. Hausman

Daniel (1984). "Specification Tests for the Multinomial Logit Model". Econometrica. 52 (5): 1219–1240. doi:10.2307/1910997. hdl:1721.1/64213. JSTOR 1910997

Jerry Allen Hausman (born May 5, 1946) is the John and Jennie S. MacDonald Professor of Economics at the Massachusetts Institute of Technology and a notable econometrician. He has published numerous influential papers in microeconometrics. Hausman is the recipient of several prestigious awards including the John Bates Clark Medal in 1985 and the Frisch Medal in 1980.

He is perhaps most well known for his development of the Durbin–Wu–Hausman test.

He has done extensive work in the field of telecommunications, and is also recognized as an expert on antitrust and mergers, public finance and taxation, and regulation. Hausman also serves as the director of the MIT Telecommunications Economics Research Program.

His recent applied papers are on topics including the effect of new goods on economic welfare and their measurement in the CPI, new telecommunications technologies including cellular 3G and broadband, regulation of telecommunications and railroads, and competition in network markets. His recent econometrics papers include estimation of difference in difference models, semi-parametric duration models, mixed logit model, weak instruments, and errors in variables in non-standard situations.

Hausman received his B.A. from Brown University summa cum laude in 1968, and his Ph.D. from Nuffield College, Oxford University, where he was a Marshall Scholar, in 1973, with thesis titled Theoretical and empirical aspects of vintage capital models.

Econometrics

R. N. Stone (1954). "Report of the Evaluative Committee for Econometrica", Econometrica 22(2), p. 142. [p p. 141-146], as described and cited in Pesaran

Econometrics is an application of statistical methods to economic data in order to give empirical content to economic relationships. More precisely, it is "the quantitative analysis of actual economic phenomena based on the concurrent development of theory and observation, related by appropriate methods of inference." An introductory economics textbook describes econometrics as allowing economists "to sift through mountains of data to extract simple relationships." Jan Tinbergen is one of the two founding fathers of econometrics. The other, Ragnar Frisch, also coined the term in the sense in which it is used today.

A basic tool for econometrics is the multiple linear regression model. Econometric theory uses statistical theory and mathematical statistics to evaluate and develop econometric methods. Econometricians try to find estimators that have desirable statistical properties including unbiasedness, efficiency, and consistency. Applied econometrics uses theoretical econometrics and real-world data for assessing economic theories, developing econometric models, analysing economic history, and forecasting.

List of fellows of the Econometric Society

Fellows of the Econometric Society", Econometrica. 1 (4): 445. JSTOR 1907338. "Election of Fellows, 1935", Econometrica. 3 (4): 477–479. October 1935. JSTOR 1905639

In the scientific discipline of economics, the Econometric Society is a learned society devoted to the advancement of economics by using mathematical and statistical methods. This article is a list of its (current and in memory) fellows.

Gérard Debreu

Debreu, Gérard (July 1951). "The coefficient of resource utilization", Econometrica. 19 (3): 273–292. doi:10.2307/1906814. JSTOR 1906814. Pdf. Archived 2016-03-07

Gérard Debreu (French: [dʁɛʁ]; 4 July 1921 – 31 December 2004) was a French-born economist and mathematician. Best known as a professor of economics at the University of California, Berkeley, where he began work in 1962, he won the 1983 Nobel Memorial Prize in Economic Sciences.

Robert F. Engle

Heteroscedasticity with Estimates of the Variance of United Kingdom Inflation", Econometrica. 50 (4): 987–1008. doi:10.2307/1912773. JSTOR 1912773. Engle, Robert

Robert Fry Engle III (born November 10, 1942) is an American economist and statistician. He won the 2003 Nobel Memorial Prize in Economic Sciences, sharing the award with Clive Granger, "for methods of analyzing economic time series with time-varying volatility (ARCH)".
