## Transportation Economics/Ownership

*through the parking system, many braided filaments of direction like the Ho Chi Minh trail. CSV-5 has better throughput, but Cal-12 has better pavement.*

## Ownership

CosaNostra Pizza #3569 is on Vista Road just down from Kings park Mall. Vista Road used to belong to the State of California and now is called Fairlanes, Inc. Rte. CSV-5. Its main competition used to be a U.S. Highway and is now called Cruiseways, Inc. Rte. Cal-12. Farther up the Valley, the two competing highways actually cross. Once there had been bitter disputes, the intersection closed by sporadic sniper fire. Finally, a big developer bought the entire intersection and turned it into a drive-through mall. Now the roads feed into a parking system - not a lot, not a ramp, but a system – and lose their identity. Getting through the intersection involves tracing paths through the parking system, many braided filaments of direction like the Ho Chi Minh trail. CSV-5 has better...

## Cognition and Instruction/Sociocognitive Learning

*Craig, S. D., Chi, M. H., & VanLehn, K. (2009) Journal Of Educational Psychology, 101(4), 779-789. doi:10.1037/a0016601* Craig, S. D., Chi, M. H., & VanLehn -

== Social Cognitive Theory ==

Albert Bandura's social cognitive theory views learning as occurring within a social context and regards humans as self-organizing, proactive, self-reflecting and self-regulating. Social cognitive theory categorizes the factors in human development as environmental, behavioral, and cognitive. It portrays development as emerging from the dynamic interplay of these three types of factors. Building on Bandura's earlier focus on observation and modeling as a source of learning, social cognitive theory describes how the belief in one's competence to succeed at a task, known as self-efficacy, strongly affects learning outcome.

=== Reciprocal Determinism ===

Bandura considers his model of reciprocal determinism as a way to explain how an individual's behavior both influences...

## An Internet of Everything?/Technological and Cultural Determinism

*huge disruption in society and it instead becomes accepted as the status quo with minimal issue. In another of his books, Media, Technology and Society: -*

= Technological and Cultural Determinism =

=== Introduction ===

This chapter of An Internet of Everything? will discuss Technological and Cultural Determinism and the impact they have in digital media, and everyday society. In the History section it will discuss the historical background into how cultural determinism and technological determinism became a dominant debate over whether culture determines technology, or whether technology determines culture. The History section will also discuss key theorists who had a massive role/influence on cultural and technological determinism.

In the Definition chapter we will discuss how the terms' definitions have changed substantially over the years. Through the creation of new media and cultural movements Technological and Cultural Determinism have evolved...

Cognition and Instruction/Print version

*Craig, S. D., Chi, M. H., & VanLehn, K. (2009) Journal Of Educational Psychology, 101(4), 779-789. doi:10.1037/a0016601* Craig, S. D., Chi, M. H., & VanLehn -

= Preface =

There is a significant body of research and theory on how cognitive psychology can inform teaching, learning, instructional design and educational technology. This book is for anyone with an interest in that topic, especially teachers, designers and students planning careers in education or educational research. It is intended for use in a 13-week undergraduate course and is structured so students can study one chapter per week. The book is more brief and concise than other textbooks about cognition and instruction because it is intended to represent only knowledge that can be mastered by all students in a course of that duration. The book prepares students who wish to pursue specialized interests in the field of cognition and learning but is not a comprehensive or encyclopedic...

Survey of Communication Study/Print version

*well-established and respected body of research that challenged the status quo of many of our theoretical assumptions and research practices established -*

= Preface =

== Background ==

This project began many years ago as an attempt to find the perfect textbook for Humboldt State University's Department of Communication COMM 105-Introduction to Human Communication course. When looking for an appropriate textbook for this course, it became evident that much of the discipline of Communication uses the term "Intro Course" to mean some version of Public Speaking. Further, it became clear that a great deal of Communication departments across the country do not have an introductory course that function as a "survey" course. This is particularly unusual in light of the fact that most other disciplines have these types of courses (e.g. Introduction to Sociology, Introduction to Anthropology, etc.). These circumstances provided a quandary regarding...

Transportation Economics/Print version

*public control. The burden of proof is on those who want to change the status quo. They must prove why privatization would be beneficial to all interested -*

= About =

Transportation Economics is aimed at advanced undergraduate and graduate civil engineering, planning, business, and economics students, though the material may provide a useful review for practitioners. While incorporating theory, there is a very applied bent to the course, as all the ideas covered are intended to help inform the real decisions that are made (or should be made) in practice.

This book uses two core ideas:

Individuals (firms, agencies, agents, actors) behave according to incentives provided by their environment.

The environment is shaped by the collective behavior of individuals.

The material of each page can be covered in a ninety-minute lecture.

== Authors ==

Authors of this book include David Levinson, David Gillen, Michael Iacono, and others ...
