Introduction

In a medium-sized bowl, whisk together milk, cream, and egg whites until thoroughly combined.

In a medium-sized saucepan, whisk together sugar, cornstarch and salt. While still whisking, drizzle cream mixture into sugar mixture until thoroughly combined and no lumps.

Cook over medium heat, stirring constantly, until mixture thickens to a pudding-like consistency and coats the back of a spoon.

Remove from heat and pour through a fine-mesh strainer into a heatproof bowl. Whisk in butter, 1 Tablespoon at a time, and then stir in vanilla extract.

Place a piece of plastic wrap or parchment paper directly against the surface of the pastry cream and allow to cool completely to room temperature (you may speed up the process by placing in the refrigerator, and if you

are not using the cream right away once it's cooled you will need to store it in the fridge to keep from going bad).

Place softened butter in the bowl of a stand mixer (or you may use a large bowl and an electric mixer) and use a whisk attachment to beat butter on high speed until fluffy and lightened in color (about 3-5 minutes).

Reduce mixer speed to medium and begin to gradually add pastry cream, one spoonful (approximately 1-2 Tablespoons) at a time, allowing the first spoonful to be completely incorporated before adding the next.

Taste frosting, stir in powdered sugar if desired, then pipe or spread over cake/cupcakes.

Once all pastry cream has been added, slowly increase mixer speed to medium-high and beat until you have a fluffy frosting.
