Mercedes-Benz W124

the time (0.28 for the 200/200D model for the European market with 185/65 R15 tires) due to its aerodynamic body, that included plastic molding for the

The Mercedes-Benz W124 is a range of executive cars made by Daimler-Benz from 1984 to 1997. The range included numerous body configurations, and though collectively referred to as the W-124, official internal chassis designations varied by body style: saloon (W 124); estate (S 124); coupé (C 124); cabriolet (A 124); limousine (V 124); rolling chassis (F 124); and long-wheelbase rolling chassis (VF 124).

From 1993, the 124 series was officially marketed as the E-Class. The W 124 followed the 123 series from 1984 and was succeeded by the W 210 E-Class (saloons, estates, rolling chassis) after 1995, and the C 208 CLK-Class (coupés, and cabriolets) in 1997.

In North America, the W124 was launched in early November 1985 as a 1986 model and marketed through the 1995 model year. Series production began at the beginning of November 1984, with press presentation on Monday, 26 November 1984 in Seville, Spain, and customer deliveries and European market launch starting in January 1985.

Toyota iQ

The 1.0L engine is similar to the engine in Toyota Aygo. The iQ achieves 65.69 mpg?imp (4.3 L/100 km; 55 mpg?US) by European standards. UK models include

The Toyota iQ is a city car manufactured by Toyota and marketed in a single generation for Japan (2008–2016); Europe (2008–2015); and North America (2012–2015), where it was marketed as the Scion iQ. A rebadged variant was marketed in Europe as the Aston Martin Cygnet (2011–2013).

Designed at the Toyota European Design and Development studio in Nice, France, the iQ is noted for its specialized engineering to maximize passenger space and minimize length. The design accommodates four occupants.

Following a concept presented at the 2007 Frankfurt Motor Show, the production iQ debuted at the March 2008 Geneva Motor Show. Japanese sales began in November 2008 and European sales in January 2009. In 2008, the iQ was named the Japanese Car of the Year.

The name iQ, an initialism of the term intelligence quotient, recalls a competitor, the Smart Fortwo. The letters "iQ" also stand for "individuality", "innovation", "quality", a hint at its "cubic form" and also a "cue" for owners to embrace new types of vehicles and lifestyles.

The iQ reached the end of production in December 2015, and it was discontinued in Japan in April 2016.

Lancia Lybra

bottom and inside of the doors, remote key, FPS system. 15" wheels, and 195/65 R15 tyres. Optional equipment: A/C, GPS navigation with a GSM phone, electronic

The Lancia Lybra (Type 839) is a compact executive car manufactured and marketed by Italian automaker Lancia between 1998 and 2005, based on the Alfa Romeo 156 floorpan, and replacing the Dedra in Lancia's range. Like the Dedra, the Lybra was available as a Berlina (saloon) or a Station Wagon (estate). A total of

164,660 cars were made.

system. An aggregate score is calculated out of 100 as a percentage. Before R15 regulation the final score of students is not calculated as a GPA but instead

Jawaharlal Nehru Technological University, Anantapur (JNTU Anantapur) is a state university in Anantapur, Andhra Pradesh, India. Founded in 1946, it has since 1973 been a constituent college of Jawaharlal Nehru Technological University, as set by The Jawaharlal Nehru Technological University Act, 1972. In 2008 it had received autonomous status by the Jawaharlal Nehru Technological Universities Act, 2008.

California State Route 65

State Route 65 (SR 65) is a north-south state highway in the U.S. state of California that consists of two non-contiguous segments in the Central Valley

State Route 65 (SR 65) is a north-south state highway in the U.S. state of California that consists of two non-contiguous segments in the Central Valley. The route, originally known as the Eastside Freeway, was envisioned as a major freeway following the east side of the valley near the foothills of the Sierra Nevada, similar to the Westside Freeway (Interstate 5) on the opposite side of the valley. Of the estimated 300 miles (480 km), only 95 miles (153 km) were constructed due to funding issues, environmental concerns, and low population growth.

The southern segment begins at SR 99, near Bakersfield and terminates at SR 198 near Exeter. It also serves the communities of Oildale, Ducor, Terra Bella, Porterville, Strathmore, and Lindsay. The northern segment begins at Interstate 80 in Roseville and terminates at SR 70 at Olivehurst. It also serves the communities of Rocklin, Lincoln, and Wheatland. If built, the center segment would serve the communities of Ivanhoe, Reedley, Sanger, Waterford, and Oakdale.

ThinkPad R series

aluminum lid and base. This is the second and last generation of ThinkPad R15 based on the ThinkPad E15 Gen 2. This is the 3rd generation of ThinkPad R14

The ThinkPad R Series is a line of budget to mid-range laptop computers released as a successor to the ThinkPad 300 Series and ThinkPad A Series originally developed by IBM from 2001 until 2005 when they sold their consumer PC division to Lenovo in 2005. It was then developed by Lenovo from 2005 to 2010 when it was discontinued in favor of having multiple different models for the different market segments that the R series originally occupied.

IBM originally released the Thinkpad R Series (Starting with the R30) as the mid-range mainstream model of the ThinkPad brand. It was conceived as a laptop "for the business executive working on a budget - a road warrior with an office network whose out-of-office work rarely goes beyond running PowerPoint shows or demonstrating spreadsheets". A laptop created as the T series but lower end, the R series computers had IBM make sacrifices in materials and construction (notably the lack of a magnesium midframe and rubberized metal lid) which higher end models of ThinkPad like the T series had. This, along with lower performance configurations when compared to the T series allowed the R series to become the lower end regular laptop model of the ThinkPad line.

Despite having a cheaper build when compared to the higher end T series of its time, it still received favorable reviews. In a review on the ThinkPad R40, CNET gave the laptop a score of 8.2, writing in their summary statement that "Good performance, along with great design and battery life, make the ThinkPad R40 a trusted friend for the traveler and the desk jockey". Starting from the R50, it became completely based

on the T series (instead of just looking similar) with the same concessions as before. Though the R series did include a FireWire port which was not brought to the T series until the ThinkPad T61.

In 2010, the R Series was discontinued in favor of the L, SL, and the E series of Thinkpads.

In 2017, it was brought back and continued as a more premium version of the ThinkPad E Series, in China only, with premium features already optioned such as aluminium lids and finger print readers.

The 1864–65 United States Senate elections were held on various dates in various states. They occurred during the American Civil War and Abraham Lincoln's re-election. As these U.S. Senate elections were prior to the ratification of the Seventeenth Amendment in 1913, senators were chosen by state legislatures. Senators were elected over a wide range of time throughout 1864 and 1865, and a seat may have been filled months late or remained vacant due to legislative deadlock. In these elections, terms were up for the senators in Class 2.

The Republican Party gained two seats. Most of the Southern states were absent because of the Civil War.
