1 (one, unit, unity) is a number, numeral, and glyph. It is the first and smallest positive integer of the infinite sequence of natural numbers. This fundamental property has led to its unique uses in other fields, ranging from science to sports, where it commonly denotes the first, leading, or top thing in a group. 1 is the unit of counting or measurement, a determiner for singular nouns, and a gender-neutral pronoun. Historically, the representation of 1 evolved from ancient Sumerian and Babylonian symbols to the modern Arabic numeral.

In mathematics, 1 is the multiplicative identity, meaning that any number multiplied by 1 equals the same number. 1 is by convention not considered a prime number. In digital technology, 1 represents the "on" state in binary code, the foundation of computing. Philosophically, 1 symbolizes the ultimate reality or source of existence in various traditions.

In numerology, 11:11 is considered to be a significant moment in time for an event to occur. It is seen as an example of synchronicity, as well as a favorable sign or a suggestion towards the presence of spiritual influence. It is additionally thought that the repetition of numbers in the sequence adds "intensity" to them and increases the numerological effect.

Critics highlight the lack of substantial evidence for this assertion, and they gesture towards confirmation bias and post-hoc analysis as a scientific explanation for any claims related to the significance or importance of 11:11 and other such sequences. Through observations made in the study of statistics, specifically chaos theory and the law of truly large numbers, skeptics explain these anecdotal observations as a coincidence and an inevitability, rather than as any particular indication towards significance.

The film is set at 11:11 on the 11th day of the 11th month and concerns an entity from another world that enters the earthly realm through Heaven's 11th gate. The film was released in 17 theaters domestically on November 11, 2011. It was distributed by Epic Pictures Group in North America, though most of its revenues were generated from foreign showings.

Windows 11

Windows 11 is the current major release of Microsoft's Windows NT operating system, released on October 5, 2021, as the successor to Windows 10 (2015)

Windows 11 is the current major release of Microsoft's Windows NT operating system, released on October 5, 2021, as the successor to Windows 10 (2015). It is available as a free upgrade for devices running Windows 10 that meet the system requirements. A Windows Server counterpart, Server 2025 was released in 2024. Windows 11 is the first major version of Windows without a corresponding mobile edition, following the discontinuation of Windows 10 Mobile.

Windows 11 introduced a redesigned Windows shell influenced by elements of the canceled Windows 10X project, including a centered Start menu, a separate "Widgets" panel replacing live tiles, and new window management features. It also incorporates gaming technologies from the Xbox Series X and Series S, such as Auto HDR and DirectStorage on supported hardware. The Chromium-based Microsoft Edge remains the default web browser, replacing Internet Explorer, while Microsoft Teams is integrated into the interface. Microsoft also expanded support for third-party applications in the Microsoft Store, including limited compatibility with Android apps through a partnership with the Amazon Appstore.

Windows 11 introduced significantly higher system requirements than typical operating system upgrades, which Microsoft attributed to security considerations. The operating system requires features such as UEFI, Secure Boot, and Trusted Platform Module (TPM) version 2.0. Official support is limited to devices with an eighth-generation Intel Core or newer processor, a second-generation AMD Ryzen or newer processor, or a Qualcomm Snapdragon 850 or later system-on-chip. These restrictions exclude a substantial number of systems, prompting criticism from users and media. While installation on unsupported hardware is technically possible, Microsoft does not guarantee access to updates or support. Windows 11 also ends

support for all 32-bit processors, running only on x86-64 and ARM64 architectures.

Windows 11 received mixed reviews upon its release. Pre-launch discussion focused on its increased hardware requirements, with debate over whether these changes were primarily motivated by security improvements or to encourage users to purchase newer devices. The operating system was generally praised for its updated visual design, improved window management, and enhanced security features. However, critics pointed to changes in the user interface, such as limitations on taskbar customization and difficulties in changing default applications, as steps back from Windows 10. In June 2025, Windows 11 surpassed Windows 10 as the most popular version of Windows worldwide. As of August 2025, Windows 11 is the most used version of Windows, accounting for 53% of the worldwide market share, while its predecessor Windows 10, holds 43%. Windows 11 is the most-used traditional PC operating system, with a 38% share of users.

Apollo 11 was the first spaceflight to land humans on the Moon, conducted by NASA from July 16 to 24, 1969. Commander Neil Armstrong and Lunar Module Pilot Edwin "Buzz" Aldrin landed the Lunar Module Eagle on July 20 at 20:17 UTC, and Armstrong became the first person to step onto the surface about six hours later, at 02:56 UTC on July 21. Aldrin joined him 19 minutes afterward, and together they spent about two and a half hours exploring the site they had named Tranquility Base upon landing. They collected 47.5 pounds (21.5 kg) of lunar material to bring back to Earth before re-entering the Lunar Module. In total, they were on the Moon's surface for 21 hours, 36 minutes before returning to the Command Module Columbia, which remained in lunar orbit, piloted by Michael Collins.

Apollo 11 was launched by a Saturn V rocket from Kennedy Space Center in Florida, on July 16 at 13:32 UTC (9:32 am EDT, local time). It was the fifth crewed mission of the Apollo program. The Apollo spacecraft consisted of three parts: the command module (CM), which housed the three astronauts and was the only part to return to Earth; the service module (SM), which provided propulsion, electrical power, oxygen, and water to the command module; and the Lunar Module (LM), which had two stages—a descent stage with a large engine and fuel tanks for landing on the Moon, and a lighter ascent stage containing a cabin for two astronauts and a small engine to return them to lunar orbit.

After being sent to the Moon by the Saturn V's third stage, the astronauts separated the spacecraft from it and traveled for three days until they entered lunar orbit. Armstrong and Aldrin then moved into Eagle and landed in the Mare Tranquillitatis on July 20. The astronauts used Eagle's ascent stage to lift off from the lunar surface and rejoin Collins in the command module. They jettisoned Eagle before they performed the maneuvers that propelled Columbia out of the last of its 30 lunar orbits onto a trajectory back to Earth. They returned to Earth and splashed down in the Pacific Ocean on July 24 at 16:35:35 UTC after more than eight days in space.

Armstrong's first step onto the lunar surface was broadcast on live television to a worldwide audience. He described it as "one small step for [a] man, one giant leap for mankind." Apollo 11 provided a U.S. victory in the Space Race against the Soviet Union, and fulfilled the national goal set in 1961 by President John F. Kennedy: "before this decade is out, of landing a man on the Moon and returning him safely to the Earth."

The iPhone 11 is a smartphone developed and marketed by Apple. It is the thirteenth generation of iPhone, succeeding the iPhone XR, and was unveiled on September 10, 2019, alongside the higher-end iPhone 11 Pro at the Steve Jobs Theater in Apple Park, Cupertino, by Apple CEO Tim Cook. Preorders began on September 13, 2019, and the phone was officially released on September 20, 2019, one day after the official public release of iOS 13.

Despite minimal exterior changes from the preceding iPhone XR, substantial design changes within the phone took place, including the addition of the more powerful Apple A13 Bionic chip as well as an ultra-wide dual-camera system. In October 2020, Apple halted the inclusion of both Apple EarPods and the wall adapter, citing environmental goals.

As of March 2022, the iPhone 11 had sold approximately 159.2 million units worldwide, making it the tenth best-selling smartphone of all time. While Apple Inc. has not released model-specific sales figures for the iPhone 11 after this date, the company announced in July 2025 that total iPhone sales have surpassed 3 billion units globally.

The iPhone 11 as well as the iPhone 12 mini and iPhone 13 Pro with its Max variant were discontinued and removed from Apple's website after the announcement of the iPhone 14 and iPhone 14 Pro on September 7, 2022.
