HR, H.R., Hr or hr may refer to:

Index.hr

Index.hr is a Croatian tabloid-like online newspaper, launched in December 2002 and based in Zagreb. It was founded by Matija Babić and was originally

Index.hr is a Croatian tabloid-like online newspaper, launched in December 2002 and based in Zagreb. It was founded by Matija Babić and was originally designed as a news aggregation website, providing news content from Croatia, Bosnia and Herzegovina, Serbia, and Slovenia. The website quickly grew in popularity and over time, more original content was produced by its growing staff until it became a popular media outlet in its own right. It has been described as having a "reputation of an independent, liberal, and strongly opposition outlet" with a "strong liberal bias". According to a 2023 report from the Ministry of Culture's Ownership and Media Funding platform, Index.hr is one of the few media outlets in Croatia that received no state subsidies or public advertising, either from national, regional or local government bodies, or from state-owned enterprises.

The news site covers politics, business, sports, show business, and features columns covering everything from gossip to political commentary. According to Alexa Internet in 2010, Index.hr is one of the top sites in Croatia, and in Bosnia and Herzegovina. As of 2018, it is the leading Croatian news website. Despite its popularity however, it is among the least trusted Croatian news brands.

.hr

.hr is the Internet country code top-level domain (ccTLD) for Croatia (the country's name is Hrvatska in the Croatian language). The .hr domain is administered

Honda HR-V

The Honda HR-V is a subcompact crossover SUV (B-segment) manufactured and marketed by Honda over three generations. The first generation HR-V, based on

The Honda HR-V is a subcompact crossover SUV (B-segment) manufactured and marketed by Honda over three generations.

The first generation HR-V, based on the Honda Logo, was marketed from 1999 to 2006 in Europe, Japan and select Asia-Pacific markets, in either three-door (1999–2003) or five-door (1999–2006) configurations — internally designated GH2 and GH4 respectively.

After a seven-year hiatus, Honda reintroduced the nameplate for the second generation HR-V, based on the third-generation Honda Fit. Production began in late 2013 for the Japanese domestic market as the Honda Vezel (Japanese: ????????, Hepburn: Honda Vezu), while production started in 2015 for North America,

Australia, Brazil and select Asian markets as the HR-V. Apart from Japan, the model is also sold as the Vezel in China.

For the third-generation model, the nameplate is split between two different vehicles, one for the global market (sold as the Vezel in Japan), and a larger model based on the eleventh-generation Civic destined for North America and China. The latter model is sold outside those markets as the Honda ZR-V.

According to Honda, the name "HR-V" stands for "Hi-rider Revolutionary Vehicle", while the name "Vezel" is coined from "bezel", the oblique faces of a cut gem, with the "V" for "vehicle".

HR 8799

HR 8799 is a roughly 30 million-year-old main-sequence star located 133.3 light-years (40.9 parsecs) away from Earth in the constellation of Pegasus. It

HR 8799 is a roughly 30 million-year-old main-sequence star located 133.3 light-years (40.9 parsecs) away from Earth in the constellation of Pegasus. It has roughly 1.5 times the Sun's mass and 4.9 times its luminosity. It is part of a system that also contains a debris disk and at least four massive planets. These planets were the first exoplanets whose orbital motion was confirmed by direct imaging. The star is a Gamma Doradus variable: its luminosity changes because of non-radial pulsations of its surface. The star is also classified as a Lambda Boötis star, which means its surface layers are depleted in iron peak elements. It is the only known star which is simultaneously a Gamma Doradus variable, a Lambda Boötis type, and a Vega-like star (a star with excess infrared emission caused by a circumstellar disk).

Toyota C-HR

The Toyota C-HR (Japanese: ??? C-HR, Hepburn: Toyota Sh?eichi?ru) is a subcompact crossover SUV manufactured and marketed by Japanese automaker Toyota

The Toyota C-HR (Japanese: ??? C-HR, Hepburn: Toyota Sh?eichi?ru) is a subcompact crossover SUV manufactured and marketed by Japanese automaker Toyota since 2016. Since 2020, it is positioned between the Yaris Cross and Corolla Cross in Toyota's crossover SUV range.

The first-generation C-HR was available in many regions, including Japan, China, North America, Europe, Southeast Asia, and Australasia, and was produced in four countries. Since the release of the second-generation C-HR in 2023, availability of the C-HR has been limited to Europe and Australia, with production centralised in Turkey. The Corolla Cross, released in 2020, has largely taken over the model's positioning outside Europe.

H.R. Pufnstuf

H.R. Pufnstuf is an American children's television series created by Sid and Marty Krofft. It was the first independent live-action, life-sized-puppet

H.R. Pufnstuf is an American children's television series created by Sid and Marty Krofft. It was the first independent live-action, life-sized-puppet program, following on from their work with Hanna-Barbera's program The Banana Splits Adventure Hour. The seventeen episodes were originally broadcast Saturday from September 6, 1969, to December 27, 1969. The broadcasts were successful enough that NBC kept it on the schedule as reruns until September 4, 1971. The show was shot at Paramount Studios and its opening was shot at Big Bear Lake, California. Reruns of the show returned on ABC Saturday morning from September 2, 1972, to September 8, 1973, and on Sunday mornings in some markets from September 16, 1973, to September 8, 1974. It was syndicated by itself from September 1974 to June 1978 and in a package with six other Krofft series under the banner Krofft Superstars from 1978 to 1985. Reruns of the show were featured on TV Land in 1999 as part of its Super Retrovision Saturdaze Saturday morning-related overnight prime

programming block and in the summer of 2004 as part of its TV Land Kitschen weekend late-night prime programming block, and it was later shown on MeTV from 2014 until 2016.

In 2004 and 2007, H.R. Pufnstuf was ranked #22 and #27 respectively on TV Guide's Top Cult Shows Ever.

Fast food chain McDonald's later emulated aspects of the series for its long-running advertising campaign McDonaldland, and the company was successfully sued by the Krofft brothers for copyright infringement.

H.R. (musician)

Paul D. Hudson (born February 11, 1956), known professionally as H.R. (Human Rights), is an American musician who leads the hardcore punk band Bad Brains

Paul D. Hudson (born February 11, 1956), known professionally as H.R. (Human Rights), is an American musician who leads the hardcore punk band Bad Brains, and is an instrumental figure in the development of the genre. His vocal delivery has been described as diverse, ranging from a rapid-fire nasal whine, to feral growling and screeches, to smooth near-crooning or staccato reggae rhymes. He has departed the band periodically to pursue solo efforts that are more inspired by reggae than Bad Brains' punk sound. He is the older brother of Bad Brains' drummer Earl Hudson.

Human resource management

overall purpose of human resources (HR) is to ensure that the organization can achieve success through people. HR professionals manage the human capital

Human resource management (HRM) is the strategic and coherent approach to the effective and efficient management of people in a company or organization such that they help their business gain a competitive advantage. It is designed to maximize employee performance in service of an employer's strategic objectives.

Human resource management is primarily concerned with the management of people within organizations, focusing on policies and systems. HR departments are responsible for overseeing employee-benefits design, employee recruitment, training and development, performance appraisal, and reward management, such as managing pay and employee benefits systems. HR also concerns itself with organizational change and industrial relations, or the balancing of organizational practices with requirements arising from collective bargaining and governmental laws.

The overall purpose of human resources (HR) is to ensure that the organization can achieve success through people. HR professionals manage the human capital of an organization and focus on implementing policies and processes. They can specialize in finding, recruiting, selecting, training, and developing employees, as well as maintaining employee relations or benefits. Training and development professionals ensure that employees are trained and have continuous development. This is done through training programs, performance evaluations, and reward programs. Employee relations deals with the concerns of employees when policies are broken, such as in cases involving harassment or discrimination. Managing employee benefits includes developing compensation structures, parental leave, discounts, and other benefits. On the other side of the field are HR generalists or business partners. These HR professionals could work in all areas or be labour relations representatives working with unionized employees.

HR is a product of the human relations movement of the early 20th century when researchers began documenting ways of creating business value through the strategic management of the workforce. It was initially dominated by transactional work, such as payroll and benefits administration, but due to globalization, company consolidation, technological advances, and further research, HR as of 2015 focuses on strategic initiatives like mergers and acquisitions, talent management, succession planning, industrial and labor relations, and diversity and inclusion. In the current global work environment, most companies focus on lowering employee turnover and on retaining the talent and knowledge held by their workforce.

Toyota C-HR+

The Toyota C-HR+ is a battery electric compact crossover SUV (C-segment) manufactured by Toyota. The vehicle was unveiled in March 2025. It is expected

The Toyota C-HR+ is a battery electric compact crossover SUV (C-segment) manufactured by Toyota. The vehicle was unveiled in March 2025. It is expected to be released in Europe in late 2025. In North America, the vehicle is marketed simply as the Toyota C-HR. A Subaru version is marketed as the Subaru Uncharted.

Named after the smaller hybrid electric Toyota C-HR, the C-HR+ is a larger vehicle built on a separate e-TNGA platform shared with the bZ4X.
