The Deku Tree has granted Link a fairy and summoned them both to meet him. After obtaining both a sword and a shield, the equipment necessary to fight battles, Link stands before the huge tree.

The Deku Tree has become infected with a great evil, and he asks Link and Navi to venture inside him and kill it...

== Inside the Deku Tree ==

Be warned — you now face death! The inside of the Deku Tree opens up to reveal a large cavernous space filled with monsters!

In the great entrance, you are greeted by Deku Babas. Unlike the withered ones you faced before, these Deku Babas are full of energy and will lunge at you. When you kill Deku Babas, be aware that sometimes they will regenerate. For every normal Deku Baba you kill, you can get a Deku Nut, an item that stuns enemies. Withered Deku Babas that...

== Trainz Overview ==

A full Trainz release is an advanced 'industrial strength' railroading simulator with world modeling abilities, not just a computer game. It is designed to allow model railroading in 'V-scale', or Virtual-scale, meaning creates and allows a user to interact with a virtual reality, which is the computing technical term for creating and playing around in an alternative reality of your own or another's making. It was one of the first commercially released software packages that did so, and unlike the big budget Microsoft Train Simulator (MSTS), released the same year—and quite a few others—it is both relatively easy to model in, and still going strong as a series.

It is extensible in all versions and Trainz releases make up a family of backwards compatible products with...

If you look at a DVD-Video disc on a PC, you will see a common directory structure: at the top level, a directory called VIDEO_TS, and probably also one called AUDIO_TS. The latter will have nothing in it; it is part of the structure of DVD-Audio discs, which never seemed to become very popular, details of which are not publicly-known.

Inside the VIDEO_TS directory, you will see a bunch of files with names ending in .IFO, .BUP and .VOB. The (typically large) .VOB files contain the actual MPEG-format content, while the (much smaller) .IFO

("info") files contain information about the menu and title structure. The .BUP ("backup") files are copies of the corresponding .IFO files with the same name, meant to be kept on a physically separate area of the disc, to provide some robustness in the event...

Goldfish are often cited as one of the easiest types of fish to care for in an aquarium setting. Goldfish are relatively hardy, being able to tolerate fluctuations in temperature and water quality. In addition to this, goldfish can live in an aquarium setting for as much as 10 years! However, many people mistakenly believe that goldfish do not require as much care and attention...

The Trainzer as a content manager will generally find themselves needing to run more than one Windows applications at a time. When one does so, getting around goes much better if one can master common Microsoft defined HotKeys that often are used in other applications near universally, and which have become de facto industry standards (e.g. CTRL+S will almost always SAVE from an application, while ALT+F, ALT+E, ALT+V all have common reserved tasks inside Windows opening the drop down menus File..., Edit..., and View...; each enabling a follow on HotKey (so a three keypress sequence, an extended Hotkey, in effect.) in the list of actions in that drop down menu — see the Underlined letters in the various drop down menu's listed lines) so mastering them can be greatly empowering and the difference...
