After Gun Violence

Mass shootings have become the “new normal” in American life. The same can be said for the public debate that follows a shooting: blame is cast, political postures are assumed, but no meaningful policy changes are enacted. In *After Gun Violence*, Craig Rood argues that this cycle is the result of a communication problem. Without advocating for specific policies, Rood examines how Americans talk about gun violence and suggests how we might discuss the issues more productively and move beyond our current, tragic impasse. Exploring the ways advocacy groups, community leaders, politicians, and everyday citizens talk about gun violence, Rood reveals how the gun debate is about far more than just guns. He details the role of public memory in shaping the discourse, showing how memories of the victims of gun violence, the Second Amendment, and race relations influence how gun policy is discussed. In doing so, Rood argues that forgetting and misremembering this history leads interest groups and public officials to entrenched positions and political failure and drives the public further apart. Timely and innovative, *After Gun Violence* advances our understanding of public discourse in an age of gridlock by illustrating how public deliberation and public memory shape and misshape one another. It is a search to understand why public discourse fails and how we can do better.

After-school Care of School-age Children

Recent disasters have demonstrated the critical role that re-housing victims play in communities' long term disaster recovery. This book examines the history and theories of rehousing, the role of bonding social capital, applies systems theory to understanding the stages of recovery, then presents case studies of long term housing recovery following Hurricane Katrina and Hurricane Sandy in the United States, Hurricane Maria in Dominica, the 2010 earthquake in Haiti, and a variety of disasters in Turkey, Nepal, Japan, and India. Together these chapters address what Dr. Louise Comfort has called “one of the most persistent and difficult policy problems in the field: long term recovery of communities following disaster.”

Housing Recovery after Disasters

Zara Evans has come to the Aurelia Theater, home to director Leopold Henneman, to play a dream role in *Echo and Ariston*, the Greek tragedy that taught her everything she knows about love. When the director asks Zara to promise that she will have no outside commitments, no distractions, it's easy to say yes. But are the deaths at the theater accidents, or murder, or a curse that always comes in threes? When assistant lighting director Eli Vasquez, a girl made of tattoos and abrupt laughs and every form of light, looks at Zara it's hard not to fall in love.

Life After Medicine

As the new administration moved beyond its first year in office, Obama's politics of hope increasingly has been transformed into a politics of accommodation. To many of his supporters, his quest for pragmatism and realism has become a weakness rather than a strength. By focusing on those areas where Obama grounded his own sense of possibility, Giroux critically investigates the well-being and future of young people, including the necessity to overcome racial injustices, the importance of abiding by the promise of a democracy to come, and the indisputable value of education in democracy. Giroux shows why considerations provide the ethical and political foundations for enabling hope to live up to its promises, while making civic responsibility and education central to a movement that takes democracy seriously.

Politics After Hope

Thirty years after the Argentinian invasion of the Falkland Islands, the war remains a source of continued debate and analysis for politicians, historians and military strategists. Not only did the conflict provide a fascinating example of modern expeditionary warfare, but it also brought to the fore numerous questions regarding international law, sovereignty, the inheritance of colonialism, the influence of history on national policy and the use of military force for domestic political uses. As the essays in this collection show, the numerous facets of the Falklands War remain current today and have ramifications far beyond the South Atlantic. Covering issues ranging from military strategy to Anglo-American relations, international reactions and international law to media coverage, the volume provides an important overview of some of the complex issues involved, and offers a better understanding of this conflict and of the tensions which still exist today between London and Buenos Aires. Of interest to scholars of history, politics, international relations and defence studies, the volume provides a timely and forthright examination of a short but bloody episode of a kind that is likely to be seen with increasing frequency, as nations lay competing claims to disputed territories around the globe.

Violence After School

I am waiting for Mark. For the last several months he has been missing, Garbo-like, from public life. But in reality he has been writing a new book. We have agreed to go back over the original manuscripts for this

edition, to do some editing, add in some extras, delete a few choice words and phrases. We meet in his London home, where he is dressed in a workday uniform of brown shirt, jeans and trainers, hair clipped up in practical busy-busy fashion, all smiles and loud laughter. We first met over five years ago. Then we tentatively shook hands and the laughter was nervous. All that has changed. But some things have not. He still famously hates interviews. Around us there is evidence of a very regular existence. There are books scattered everywhere, a Sony widescreen with a DVD of Shackleton sitting below it. Atop the fireplace hangs a painting called Fishermen by James Southall, a tableau of weather-beaten sea dogs wrestling with a rowing boat; a gift he bought himself on the anniversary of a publication. Balanced against a wall in the office next door is a replica of the Rosebud sledge burned at the dramatic conclusion of Citizen Kane. As I unpack my scripts, I begin with a question. You once said, 'There is a figure that is adored, but I'd question very strongly that it's me.' There is silence. A stare. You did say it. 'Well supposedly I said that. But in what context did I say it?' Just talking about people building up this image of you. It was one of the first things you ever said to me. 'Yes, but I'm not, am I?' There was also that interview that described you as someone fragile being who's hidden himself away. 'That was fairly amusing. A lot of the time it doesn't bother me. I suppose I do think I go out of my way to be a very normal person and I just find it frustrating that people think that I'm some kind of weirdo reclusive that never comes out into the world.' His voice notches up in volume. Did you ever feel you would finish your first book? 'Oh yeah,' he sighs. 'I mean, there were so many times I thought, I'll have the book finished this year, definitely, I'll get it out this year. Then there were a couple of years where I thought, I'm never gonna do this. I don't know why. Time evaporates.' He walks over and picks up the manuscripts. He reads a bit. He laughs. 'Did I really agree to this?' he asks. Mark knows the answer. 'A couple of people who read the first book Tour De Europa,' he says, 'they either really liked it or they found it very uncomfortable. I liked the idea of it being uncomfortable. I thought that was great. I love the ambiguity. But I also loved looking back on lost conversations and instantly remembering an emotion.' A clock somewhere strikes two and a friend arrives with tea, pizza, avocado with balsamic vinegar and cream cake for afters, only to be playfully admonished by Mark, who protests, 'I can't eat all this shit!' It would appear some things never change.

30 Years After

Widely assigned and taught in senior capstone and social theory courses, *Sociology After the Crisis* offers the first systematic theory of social differences built on the sociological traditions by embracing to Durkheim, Weber and other familiar figures. The first edition was acclaimed for its nuanced and original rereading of Durkheim in relation to the theoretical reasons he and his contemporaries neglected race and gender. This new edition features two chapters of new material written in the summer of 2003, as the new social structures of the 21st century became increasingly clear. The new Chapter Ten draws upon 9-11, the \"new world order\" of two Bush presidencies, and globalization to show how individuals' lives and sociologies must be thought about in new ways. These events also highlight how American society and sociology have responded and sometimes failed in the struggle over the crisis of modernism. Reviews for the First Edition: \"[This] expansive reimagining of the historical roots of sociological imagination - especially as it embraces voices and visions long lost to our most important national debates - is balm to the fractured soul of American society. Lemert's elegant and passionate volume will aid immeasurably in our nation's search for sane solutions to the crises of purpose and perspective he so skillfully explores.\" Michael Eric Dyson, author of *Making Malcolm* and *Between God and Gangsta' Rap* \"Elegantly crafted.\" Steven Seidman, State University of New York at Albany

Your Money After the Big 5-0

After the years of turmoil and tragedy, life at La Bonne Vie Plantation settled into placid contentment (or a semblance of such) ... until Nicolas (Nicky) Fontenot, prodigal son of Angelique and her brother François, returns after years in a Texas prison, and Antoine Babineaux II returns to claim his father's name. At the heart of the story, and the hearts of Antoine and Nicolas, is beautiful, incorrigible Desirée Fontenot, the image of her mother Angelique. Ghosts of the past rise up and the lurid whispers and innuendos come to life once again. Then Uncle Virgil Leveque, the catalyst of the earlier tragedy, returns home after thirty years in an insane asylum, and unwittingly becomes the agent provocateur that sends the story hurtling toward its conclusion and closure at last. But is there truly closure?

After The School Bell Rings

The interplay between peace and justice plays an important role in any contemporary conflict. Peace can be described in a variety of ways, as being 'negative' or 'positive', 'liberal' or 'democratic'. But what is it that makes a peace just? This book draws together leading scholars to study this concept of a 'just peace', analysing different elements of the transition from conflict to peace. The volume covers six core themes: conceptual approaches towards just peace, macro-principles, the nexus to security and stability, protection of persons and public goods, rule of law, and economic reform and accountability. Contributions engage with understudied issues, such as the pros and cons of robust UN mandates, the link between environmental protection and indigenous peoples, the treatment of illegal settlements, the feasibility of vetting practices, and the protection of labour rights in post-conflict economies. Overall, the book puts forward a case that just peace requires not only negotiation, agreement, and compromise, but contextual understandings of law, multiple dimensions of justice, and strategies of prevention. The rule of law is indispensable for sustained peace, good governance, and economic growth, especially in countries recovering from civil war. Yet despite its importance, we know surprisingly little about how to restore the rule of law in the wake of conflict. In this book, Robert A. Blair proposes a new theory to explain how the international community can help establish the rule of law in the world's weakest and most war-torn states, focusing on the crucial but often underappreciated role of the United Nations. Blair tests the theory by drawing on original household surveys in Liberia, highly disaggregated data on UN personnel and activities across Africa, and hundreds of interviews with UN officials, local leaders, citizens, and government and civil society representatives. The book demonstrates that UN intervention can have a deeper, more lasting, and

more positive effect on the rule of law than skeptics typically believe.

Peacekeeping, Policing, and the Rule of Law after Civil War

Reclaiming public life from the ideologies of both communist regimes and neoliberalism, their projects have harnessed the politically subversive potential of social relations based on trust, reciprocity and solidarity. Drawing on archival material and exclusive interviews, in this book Izabel Galliera traces the development of socially engaged art from the early 1990s to the present in Bulgaria, Hungary and Romania. She demonstrates that, in the early 1990s, projects were primarily created for exhibitions organized and funded by the Soros Centers for Contemporary Art. In the early 2000s, prior to Bulgaria, Hungary and Romania entering into the European Union, EU institutions likewise funded socially-conscious public art in the region. Today, socially engaged art is characterised by the proliferation of independent and often self-funded artists' initiatives in cities such as Sofia, Bucharest and Budapest. Focusing on the relationships between art, social capital and civil society, Galliera employs sociological and political theories to reveal that, while social

capital is generally considered a mechanism of exclusion in the West, in post-socialist contexts it has been leveraged by artists and curators as a vital means of communication and action.

2012 American Bar Association Gavel Award Honorable Mention for Books 2012 Scribes Book Silver Medal Award presented by the American Society of Legal Writers The U.S. detention center at Guantánamo Bay has long been synonymous with torture, secrecy, and the abuse of executive power. It has come to epitomize lawlessness and has sparked protracted legal battles and political debate. For too long, however, Guantánamo has been viewed in isolation and has overshadowed a larger, interconnected global detention system that includes other military prisons such as Bagram Air Base in Afghanistan, secret CIA jails, and the transfer of prisoners to other countries for torture. Guantánamo is simply—and alarmingly—the most visible example of a much larger prison system designed to operate outside the law. Habeas Corpus after 9/11 examines the rise of the U.S.-run global detention system that emerged after 9/11 and the efforts to challenge it through habeas corpus (a petition to appear in court to claim unlawful imprisonment). Habeas expert and litigator Jonathan Hafetz gives us an insider's view of the detention of “enemy combatants” and an accessible explanation of the complex forces that keep these systems running. In the age of terrorism, some argue that habeas corpus is impractical and unwise. Hafetz advocates that it remains the single most important check against arbitrary and unlawful detention, torture, and the abuse of executive power.

Christmas After Dark - 36 Holiday Ghost Stories & Supernatural Thrillers

This book discusses the impact of the COVID-19 pandemic and the Russian invasion of Ukraine on the European Union's climate and energy policy. By examining the positions of the various actors involved, the book analyses whether the COVID-19 pandemic and the Russian invasion of Ukraine has contributed to greater unity, decarbonisation, and security of energy supply, and if not, whether these crises prompted member states to turn inwards and opt for national solutions to climate and energy challenges. It thus provides a new outlook for EU energy policy in relation to the experience of the two crises. This book will be of key interest to scholars, students and practitioners of climate and energy policy, energy security, EU policy, and more broadly to energy politics, European integration and European Union governance.

The Children of Looked After Children

This volume analyses South American regional and international cooperation during the COVID19 crisis started in 2020. Across thirteen chapters a collection of leading experts address how regional collaboration has developed, evolved, and recoiled. The chapters explore the state of regionalism at the pandemic surge and the challenges and opportunities this situation has opened for regional and international cooperation. Authors analyze the role of extra-regional powers and traditional regional leaders during the pandemic, identifying the extent to which regional cooperation has been possible across several policy agendas. They argue that fragmented visions of regionalism, ideological polarization, and weak leadership, has prevailed from before the pandemic which, accompanied by adverse interactions among major powers, has ensured that cooperation has remained bilateral rather than regional. Ultimately all these factors have created a complex scenario in which disintegration dynamics have emerged, darkening, even more, the South American regional panorama. Regional and International Cooperation in South America After COVID will be an invaluable resource for students, scholars and policy specialists of regionalism and regional integration, Latin American studies, international relations and international political economy.

Once Upon a Frog (Whatever After #8)

This book provides an original theoretically and empirically grounded analysis of regulatory enforcement activism in post-crisis periods and the ensuing regulatory interactions. It critically addresses the 'more regulation' enforcement agenda relating to financial misconduct in the aftermath of the 2008 financial crisis, showing how misconduct was constructed through the enforcement policies and practices of the powerful UK financial conduct regulator and its interactions with the subjects of enforcement proceedings and their legal representatives during a tumultuous time in the financial markets. Drawing from interviews with regulators, professional intermediaries, and markets participants; documentary analysis of enforcement decisions and speeches; and observations, the volume adopts an interdisciplinary approach grounded in social constructivist perspectives on compliance and deviance, regulation theory, and socio-legal research. Through a multi-dimensional analytical framework of regulatory enforcement activism that links shifts in regulatory policymaking; experimentations with legal powers in information-gathering, legal and extra-legal penalties, and individual accountability; and the use of enforcement tools in micro-level interactions, the book documents a more interventionist and punitive post-crisis enforcement agenda. The findings challenge current thinking in the 'scandal and reform' literature. The work argues that despite the increased focus on enforcement, it is not necessarily the case that the power has tilted more towards the regulator. This fine-grained socio-legal enquiry makes innovative and timely theoretical contributions to our understanding of the limitations of regulatory activism and regulatory control, regulatory relationships, the governance of financial markets, and broader thinking on regulating corporations and the individuals within them. It will appeal to academics, researchers, regulators, and policymakers working in regulation across law, criminology, sociology, and politics.

Habeas Corpus after 9/11

The year 2022 is the 50th anniversary of Alfred Crosby's celebrated book - *The Columbian Exchange: Biological and Cultural Consequences of 1492*. In the book, Crosby was the first to discuss the impact that the Spanish and Portuguese colonial period had on world agriculture and human culture. How the crops of the world became homogenized, and how an indigenous culture was destroyed by disease after Columbus landed. His landmark study broke new ground in its broad conceptualization of the Atlantic exchange. Building on what Crosby so succinctly and brilliantly presented, the main goal of this new work is to present the depth of information that has emerged since "*The Columbian Exchange*" and to discuss more fully the development of crops and agriculture before and after the Iberian contact. It follows the journey of crops and livestock in the Old and New Worlds and ends with their distribution in today's world.

The Bradys and the Hip Sing Ling; Or, After the Chinese Free Masons

Presenting a full and precise description of all legal ties between landlord and tenant in early modern England, *Agrarian Problems in the Sixteenth Century and After* re-examines one of the key issues in English agrarian history - the question of the legal security of the copyholder. Comparing historical records and literary evidence, *Agrarian Problems in the Sixteenth Century and After* reprints much of the important 1969 edition of the book, and asserts that: * customary tenants enjoyed legal security in and before the sixteenth century * enclosures proceeded legally, without oppression, and in much the same form (whether ratified in parliament or not) throughout the whole period * depopulation was less extensive than sometimes supposed and that such depopulation as there was often proved economically profitable and not without social benefit. When first published in 1969, this fascinating book represented a unique viewpoint that affected, and in some cases reversed, much accepted opinion. As a landmark work in a highly important area of English agrarian history, it still has considerable impact today.

EU Energy and Climate Policy after COVID-19 and the Invasion of Ukraine

This is the first book to fully examine, from an evolutionary point of view, the association of social status and fertility in human societies before, during, and after the demographic transition. In most nonhuman social species, social status or relative rank in a social group is positively associated with the number of offspring, with high-status individuals typically having more offspring than low-status individuals. However, humans appear to be different. As societies have gotten richer, fertility has dipped to unprecedented lows, with some developed societies now at or below replacement fertility. Within rich societies, women in higher-income families often have fewer children than women in lower-income families. Evolutionary theory suggests that the relationship between social status and fertility is likely to be somewhat different for men and women, so it is important to examine this relationship for men and women separately. When this is done, the positive association between individual social status and fertility is often clear in less-developed, pre-transitional societies, particularly for men. Once the demographic transition begins, it is elite families, particularly the women of elite families, who lead the way in fertility decline. Post-transition, the evidence from a variety of developed societies in Europe, North America and East Asia is that high-status men (particularly men with high personal income) do have more children on average than lower-status men. The reverse is often true of women, although there is evidence that this is changing in Nordic countries. The implications of these observations for evolutionary theory are also discussed. This book will be of interest to students and researchers in the social sciences with an interest in evolutionary sociology, evolutionary anthropology, evolutionary psychology, demography, and fertility.
