The Uru is a submachine gun made by the production firm Mekanika in 1977 for the Brazilian Army and Police Forces. License for weapons in 1988, bought the branch of FAU, which modernized the Thompson submachine gun in model 2. SACO Defense of the US manufactured the Uru as the Model 683 for countries without an industrial basis but were sued for copyright violations.

The overall weapon has a cylindrical body. It made the front of the air vents for cooling trunk. A tubular casing in a shop, serving also as the front handle, trigger and pistol grip. There is also a safety/selector switch, which can be translated into two points: first - for self-shooting, second - for the automatic.

There are a few different versions of the Uru: standard models chambered in 9mm Parabellum, which include early models with fixed tubular stocks and later examples with both wire and tubular folding stocks, and a pistol-caliber carbine in .38 ACP with a wooden buttstock. Optional accessories include a conical flash hider and a special barrel featuring an integrated sound suppressor that the operator may swap to rather than the standard barrel pattern.

The SYM VF3i 185 (also known as the SYM Star SR 170i in Vietnam) is a fuel-injected underbone motorcycle model by Taiwanese motorcycle company SYM Motors. The SYM VF3i is currently the largest-engined underbone motorcycle in the world, powered by a 183 cc SOHC 4-valve water-cooled engine. It was debuted in Malaysia on 5 April 2018 before being sold in Vietnam later in December. In Vietnam, however, the VF3i is given a smaller 174.5 cc engine and is sold as the SYM Star SR 170.

List of submachine guns

*Royal Small Arms Factory 9×19mm Parabellum United Kingdom 1947 SMG Mekanika Uru Mekanika
Industria e Commercio 9×19mm Parabellum .38 ACP Brazil 1977 SMG*

This is a list of submachine guns.

It includes Submachine guns (SMG), Machine pistols (MP), Personal defense weapon systems (PDW), and "compact submachine gun-like weapons" not easily categorized. Weapons may fit in more than one category.

This weapon was used in *Alien* (1979) as the crew members' blaster weapon, after several visual modifications to give it a retro-futuristic look.

Comparison of Indonesian and Standard Malay

mekanik mekanik mechanic, mechanical mekanis mekanik mekanik mechanics mekanika mekanik mekanik technician tèknisi jurutèknik téknisyen violence kekerasan

Indonesian and Malaysian Malay are two standardised varieties of the Malay language, the former used officially in Indonesia (and in Timor Leste as a working language) and the latter in Brunei, Malaysia and Singapore. Both varieties are generally mutually intelligible, yet there are noticeable differences in spelling, grammar, pronunciation and vocabulary, as well as the predominant source of loanwords. The differences can range from those mutually unintelligible with one another, to those having a closer familial resemblance. The divergence between Indonesian and "Standard" Malay are systemic in nature and, to a certain extent, contribute to the way the two sets of speakers understand and react to the world, and are more far-reaching with a discernible cognitive gap than the difference between dialects. The regionalised and localised varieties of Malay can become a catalyst for intercultural conflict, especially in higher education.

List of FLCL characters

it is pronounced "atomisk"; Medical Mechanica (????????, Medikaru Mekanika) is a mysterious organization that serves as a secondary antagonist in

The central characters in FLCL (also known as *Fooly Cooly*), a 2000 Japanese anime produced by Gainax and Production I.G, with two additional seasons released in 2018, followed by two more seasons in 2023. The first season covers the story of a sixth grade student named Naota Nandaba whose life is greatly changed after he is run over by the mysterious alien troublemaker Haruko Haruhara. The second season covers the story of a seventh grade student named Hidomi Hibajiri whose life Haruko also intrudes.
