

Who Was Steve Jobs

Steve Jobs

of people who could stand at the intersection of humanities and sciences, and I decided that's what I wanted to do. —Steve Jobs Paul Jobs worked in several

Steven Paul Jobs (February 24, 1955 – October 5, 2011) was an American businessman, inventor, and investor best known for co-founding the technology company Apple Inc. Jobs was also the founder of NeXT and chairman and majority shareholder of Pixar. He was a pioneer of the personal computer revolution of the 1970s and 1980s, along with his early business partner and fellow Apple co-founder Steve Wozniak.

Jobs was born in San Francisco in 1955 and adopted shortly afterwards. He attended Reed College in 1972 before withdrawing that same year. In 1974, he traveled through India, seeking enlightenment before later studying Zen Buddhism. He and Wozniak co-founded Apple in 1976 to further develop and sell Wozniak's Apple I personal computer. Together, the duo gained fame and wealth a year later with production and sale of the Apple II, one of the first highly successful mass-produced microcomputers.

Jobs saw the commercial potential of the Xerox Alto in 1979, which was mouse-driven and had a graphical user interface (GUI). This led to the development of the largely unsuccessful Apple Lisa in 1983, followed by the breakthrough Macintosh in 1984, the first mass-produced computer with a GUI. The Macintosh launched the desktop publishing industry in 1985 (for example, the Aldus Pagemaker) with the addition of the Apple LaserWriter, the first laser printer to feature vector graphics and PostScript.

In 1985, Jobs departed Apple after a long power struggle with the company's board and its then-CEO, John Sculley. That same year, Jobs took some Apple employees with him to found NeXT, a computer platform development company that specialized in computers for higher-education and business markets, serving as its CEO. In 1986, he bought the computer graphics division of Lucasfilm, which was spun off independently as Pixar. Pixar produced the first computer-animated feature film, *Toy Story* (1995), and became a leading animation studio, producing dozens of commercially successful and critically acclaimed films.

In 1997, Jobs returned to Apple as CEO after the company's acquisition of NeXT. He was largely responsible for reviving Apple, which was on the verge of bankruptcy. He worked closely with British designer Jony Ive to develop a line of products and services that had larger cultural ramifications, beginning with the "Think different" advertising campaign, and leading to the iMac, iTunes, Mac OS X, Apple Store, iPod, iTunes Store, iPhone, App Store, and iPad. Jobs was also a board member at Gap Inc. from 1999 to 2002. In 2003, Jobs was diagnosed with a pancreatic neuroendocrine tumor. He died of tumor-related respiratory arrest in 2011; in 2022, he was posthumously awarded the Presidential Medal of Freedom. Since his death, he has won 141 patents; Jobs holds over 450 patents in total.

Steve Jobs (film)

Steve Jobs is a 2015 biographical drama film directed by Danny Boyle and written by Aaron Sorkin. A British-American co-production, it was adapted from

Steve Jobs is a 2015 biographical drama film directed by Danny Boyle and written by Aaron Sorkin. A British-American co-production, it was adapted from the 2011 biography by Walter Isaacson and interviews conducted by Sorkin. The film covers fourteen years in the life of Apple Inc. co-founder Steve Jobs, specifically ahead of three press conferences he gave during that time: the formal unveiling of the Macintosh 128K on January 24, 1984; the unveiling of the NeXT Computer on October 12, 1988; and the unveiling of the iMac G3 on May 6, 1998. Jobs is portrayed by Michael Fassbender, with Kate Winslet as Joanna

Hoffman, Seth Rogen as Steve Wozniak, and Jeff Daniels as John Sculley in supporting roles.

Development began in 2011 after the rights to Isaacson's book were acquired. Filming began in January 2015. A variety of actors were considered and cast before Fassbender eventually took the role. Editing was extensive on the project, with editor Elliot Graham starting while the film was still shooting. Daniel Pemberton served as composer, with a focus on dividing the score into three distinguishable sections.

Steve Jobs premiered at the 2015 Telluride Film Festival on September 5, 2015, and began a limited release in New York City and Los Angeles on October 9, 2015. It opened nationwide in the United States on October 23, 2015, to positive reviews and grossed \$34.4 million worldwide against a budget of \$30 million. People close to Jobs such as Steve Wozniak and John Sculley praised the performances, but the film also received criticism for historical inaccuracy. Steve Jobs was nominated for Best Actor (Fassbender) and Best Supporting Actress (Winslet) at the 88th Academy Awards, and received numerous other accolades.

Reed Jobs

Steve Jobs. Reed was born to Steve Jobs and Laurene Powell Jobs. Reed was studying oncology and had started a summer internship at Stanford when he was 15

Reed Paul Jobs (born September 22, 1991) is an American venture capitalist and founder of Yosemite venture fund. He is the son of Apple Inc. co-founder Steve Jobs.

Eve Jobs

Laurene Powell Jobs. Named after Eve from the book of Genesis, Jobs is the youngest daughter of Steve Jobs (his eldest being Lisa Brennan-Jobs from his first

Eve Jobs (born July 9, 1998) is an American fashion model. She is the daughter of the late Apple Inc. co-founder Steve Jobs and businesswoman Laurene Powell Jobs.

Laurene Powell Jobs

She was married to Steve Jobs, who was the co-founder and former chief executive of Apple Inc, for more than 20 years. Powell Jobs was raised in West Milford

Laurene Powell Jobs (née Powell; born November 6, 1963) is an American entrepreneur, business executive and philanthropist. She is the founder and president of Emerson Collective, lead investor and chair of The Atlantic and co-founder and chair of XQ Institute. Powell Jobs also sits on the boards of the Ford Foundation, Council on Foreign Relations, Chicago CRED, College Track and Elemental Impact. She was married to Steve Jobs, who was the co-founder and former chief executive of Apple Inc, for more than 20 years.

Jobs (film)

1974, the high tuition costs force Steve Jobs to drop out, but Dean Jack Dudman allows him to sit in on classes. Jobs is particularly interested in a calligraphy

Jobs is a 2013 American biographical drama film based on the life of Steve Jobs, from 1974 while a student at Reed College to the introduction of the iPod in 2001. It is directed by Joshua Michael Stern, written by Matt Whiteley, and produced by Stern and Mark Hulme. Steve Jobs is portrayed by Ashton Kutcher, with Josh Gad as Apple Computer's co-founder Steve Wozniak. Jobs was chosen to close the 2013 Sundance Film Festival.

Lisa Brennan-Jobs

Brennan-Jobs (née Brennan; born May 17, 1978) is an American writer. She is the daughter of Apple Inc. co-founder Steve Jobs and Chrisann Brennan. Jobs initially

Lisa Nicole Brennan-Jobs (née Brennan; born May 17, 1978) is an American writer. She is the daughter of Apple Inc. co-founder Steve Jobs and Chrisann Brennan.

Jobs initially denied paternity for several years, which led to a legal case and various media reports in the early days of Apple. Lisa and Steve Jobs eventually reconciled, and he accepted his paternity. Brennan-Jobs later worked as a journalist and magazine writer. An early Apple business computer, the Apple Lisa, is named after her, and she has been depicted in a number of biographies and films, including the biopics *Pirates of Silicon Valley* (1999), *Jobs* (2013), and *Steve Jobs* (2015). A fictionalized version of Brennan-Jobs is a major character in her aunt Mona Simpson's novel *A Regular Guy*.

List of depictions of Steve Jobs

Steve Jobs was an American pioneer of the personal computer revolution of the 1970s who, along with Steve Wozniak and Ronald Wayne, founded Apple Computer

Steve Jobs was an American pioneer of the personal computer revolution of the 1970s who, along with Steve Wozniak and Ronald Wayne, founded Apple Computer. Before and after his death in 2011, Jobs was known as a counter-culture figure within the computer industry, and as a perfectionist who could be demanding of his colleagues and employees—sometimes to the point of cruelty.

Jobs's official biographer, Walter Isaacson, described him as a "creative entrepreneur whose passion for perfection and ferocious drive revolutionized six industries: personal computers, animated movies, music, phones, tablet computing, and digital publishing".

Steve Jobs (book)

Steve Jobs is the authorized self-titled biography of American business magnate and Apple co-founder Steve Jobs. The book was written at the request of

Steve Jobs is the authorized self-titled biography of American business magnate and Apple co-founder Steve Jobs. The book was written at the request of Jobs by Walter Isaacson, a former executive at CNN and Time who had previously written best-selling biographies of Benjamin Franklin and Albert Einstein.

Based on more than 40 interviews with Jobs conducted over two years—in addition to interviews with more than 100 family members, friends, adversaries, competitors, and colleagues—Isaacson was given "unprecedented" access to Jobs's life. Jobs is said to have encouraged the people interviewed to speak honestly. Although Jobs cooperated with the book, he asked for no control over its content other than the book's cover, and waived the right to read it before it was published.

Describing his writing, Isaacson commented that he had striven to take a balanced view of his subject that did not sugarcoat Jobs's flaws.

The book was released on October 24, 2011, by Simon & Schuster in the United States, 19 days after Jobs's death.

A film adaptation written by Aaron Sorkin and directed by Danny Boyle, with Michael Fassbender starring in the title role, was released on October 9, 2015.

Steve Wozniak

Steve Jobs. Wozniak was introduced to Jobs by Fernandez, who attended Homestead High School with Jobs in 1971. Jobs and Wozniak became friends when Jobs worked

Stephen Gary Wozniak (; born August 11, 1950), also known by his nickname Woz, is an American technology entrepreneur, electrical engineer, computer programmer, and inventor. In 1976, he co-founded Apple Computer with his early business partner Steve Jobs. Through his work at Apple in the 1970s and 1980s, he is widely recognized as one of the most prominent pioneers of the personal computer revolution.

In 1975, Wozniak started developing the Apple I into the computer that launched Apple when he and Jobs first began marketing it the following year. He was the primary designer of the Apple II, introduced in 1977, known as one of the first highly successful mass-produced microcomputers, while Jobs oversaw the development of its foam-molded plastic case and early Apple employee Rod Holt developed its switching power supply.

With human–computer interface expert Jef Raskin, Wozniak had a major influence over the initial development of the original Macintosh concepts from 1979 to 1981, when Jobs took over the project following Wozniak's brief departure from the company due to a traumatic airplane accident. After permanently leaving Apple in 1985, Wozniak founded CL 9 and created the first programmable universal remote, released in 1987. He then pursued several other ventures throughout his career, focusing largely on technology in K–12 schools.

As of June 2024, Wozniak has remained an employee of Apple in a ceremonial capacity since stepping down in 1985. In recent years, he has helped fund multiple entrepreneurial efforts dealing in areas such as GPS and telecommunications, flash memory, technology and pop culture conventions, technical education, ecology, satellites and more.
