FL Studio (known as FruityLoops before 2003) is a digital audio workstation (DAW) developed by the Belgian company Image-Line. It features a graphical user interface with a pattern-based music sequencer. It is available in four different editions for Microsoft Windows and macOS.

After their initial purchase, lifetime updates of the software are free to registered users. Image-Line also develops FL Studio Mobile for Android, iOS, macOS, and Universal Windows Platform devices.

FL Studio can be used as either a Virtual Studio Technology (VST) or Audio Unit (AU) instrument in other audio workstation programs, and as a ReWire client. Image-Line offers its own VST and AU instruments and audio applications. FL Studio has been used by many notable hip hop and EDM producers, including 9th Wonder, Cardo, Basshunter, Metro Boomin, Hit-Boy, Porter Robinson, Alan Walker, Madeon, Soulja Boy, Southside, Martin Garrix, Avicii, Imanbek, Lex Luger, Deadmau5, and Pi'erre Bourne. The previous default tempo of FL Studio (140 BPM) has been credited as being the reason grime music is generally produced around 140 BPM.

Miami

"Total Gross Domestic Product for Miami-Fort Lauderdale-West Palm Beach, FL (MSA)". Federal Reserve Economic Data. Archived from the original on January

Miami is a coastal city in the U.S. state of Florida. It is the second-most populous city in Florida with a population of 442,241 at the 2020 census, while the Miami metropolitan area in South Florida has an estimated 6.46 million residents and is the third-largest metropolitan area in the Southeast and sixth-largest metropolitan area in the United States. Miami has the third-largest skyline in the U.S. with over 300 high-rises, 70 of which exceed 491 ft (150 m). It is the county seat of Miami-Dade County.

Miami is a major center and leader in finance, commerce, culture, arts, and international trade. Miami's metropolitan area is by far the largest urban economy in Florida, with a 2017 gross domestic product of $344.9 billion. In a 2018 UBS study of 77 world cities, Miami was the third-richest city in the U.S. and the third-richest globally in purchasing power. Miami is a majority-minority city with a Hispanic and Latino population of 310,472, or 70.2 percent of the city's population, as of 2020.

Downtown Miami has among the largest concentrations of international banks in the U.S. and is home to several large national and international companies. The Health District is home to several major University of Miami-affiliated hospital and health facilities, including Jackson Memorial Hospital, the nation's largest hospital with 1,547 beds, and the Miller School of Medicine, the University of Miami's academic medical center and teaching hospital, and others engaged in health-related care and research. PortMiami, the city's seaport, is the busiest cruise port in the world in both passenger traffic and cruise lines.

The Miami metropolitan area is the second-most visited city or metropolitan statistical area in the U.S. after New York City, with over four million visitors in 2022. Due to its strong commercial and cultural ties to Latin America and majority-Hispanic population (at 70%), Miami has been called the "Gateway to Latin America" or even the "Capital of Latin America."

The Volvo FL is a series of trucks manufactured by Volvo Trucks. It was introduced in 1985 and has remained in production ever since, in a variety of different models of different weight ratings. It has been used in a variety of different roles aside from a truck, including as a fire engine.

Orlando, Florida

May 15, 2025. "Total Gross Domestic Product for Orlando-Kissimmee-Sanford, FL (MSA)". Federal Reserve Bank of St. Louis. "Growth Management Plan: 2022 –

Orlando (or-LAN-doh) is a city in and the county seat of Orange County, Florida, United States. Part of Central Florida, it is the fourth-most populous city in the state and its most populous inland city with a population of 307,573 at the 2020 census, while the Orlando metropolitan area with over 2.94 million residents is the third-largest metropolitan area in Florida and 20th-largest in the United States.

Orlando is one of the most-visited cities in the world primarily due to tourism, major events, theme parks, and convention traffic. It is the fourth-most visited city in the U.S. after New York City, Miami, and Los Angeles, with over 3.5 million visitors as of 2023. Orlando International Airport is the 7th-busiest airport in the United States and the 18th-busiest in the world. The two largest and most internationally renowned tourist attractions in the Orlando area are the Walt Disney World resort, opened by the Walt Disney Company in 1971 and located about 21 miles (34 km) southwest of Orlando in Bay Lake, and the Universal Orlando resort, opened in 1990 as a major expansion of Universal Studios Florida and the only theme park inside Orlando city limits.

Apart from its theme parks, most major cultural sites such as Orlando Museum of Art and Dr. Phillips Center for the Performing Arts, and nightlife, bars, and clubs are located in downtown Orlando. Other attractions like Orlando Eye at ICON Park are located along International Drive. The city is also one of the busiest American cities for conferences and conventions; Orange County Convention Center is the second-largest convention facility in the United States. Orlando is home to the University of Central Florida, one of the largest universities in the United States. The city's major league professional sports teams include Orlando City SC (MLS) and the Orlando Magic (NBA).

Hirose U.FL

Hirose U.FL, I-PEX MHF I, AMC or UMCC is a miniature RF connector for high-frequency signals up to 6 GHz manufactured by Hirose Electric Group, I-PEX,

Hirose U.FL, I-PEX MHF I, AMC or UMCC is a miniature RF connector for high-frequency signals up to 6 GHz manufactured by Hirose Electric Group, I-PEX, and others.

U.FL connectors are commonly used in applications where space is of critical concern, such as in smartphones and laptop Wi-Fi cards. U.FL connectors are commonly used inside laptops and embedded systems to connect the Wi-Fi antenna to a Mini PCI, Mini PCIe or M.2 Wi-Fi card. Another common use is connecting GPS antennas.

Female U.FL connectors are not designed with reconnection in mind, and they are only rated for a few reconnects (approximately 30 mating cycles) before replacement is needed. The female U.FL connectors are generally not sold separately, but rather as part of a pigtail with a high-quality 1.32 mm doubly shielded cable, which allows for a low-loss connection, insulated with fluorinated resin.

The male connectors are surface-mounted (SMT) and soldered directly to the printed circuit board (PCB). They are designed to have a characteristic impedance of 50 ohms. The mated connection is only 2.5 mm high and takes as little as 9 mm2 (3.0 × 3.1 mm) of board space.

Much like many other electronic components, Hirose U.FL connectors were protected by patents and trademarks. However, compatible third party connectors are available under many other names, such as Sunridge MCB.

Jacksonville, Florida

March 13, 2025. Retrieved March 13, 2025. "Distance from Jacksonville, FL to Miami, FL". check-distance.com. Archived from the original on February 14, 2019

Jacksonville (US: JAK-s?n-vil) is the most populous city proper in the U.S. state of Florida, located on the Atlantic coast of northeastern Florida. It is the county seat of Duval County, with which the city consolidated in 1968. It is the tenth-most populous U.S. city and the largest city in the Southeast with a population of 949,611 at the 2020 census and estimated at over 1 million in 2024, while the Jacksonville metropolitan area at over 1.76 million residents is the fourth-largest metropolitan area in Florida and 38th-largest in the United States. City-county consolidation greatly increased Jacksonville's official population and extended its boundaries, placing most of Duval County's population within the new municipal limits; Jacksonville grew to 900 square miles (2,300 km2). It is the largest city by total area in the contiguous United States.

Jacksonville straddles the St. Johns River in the First Coast region of northeastern Florida, about 12 miles (19 kilometers) south of the Georgia state line (25 mi or 40 km to the urban core/downtown) and 350 miles (560 km) north of Miami. The Jacksonville Beaches communities are along the adjacent Atlantic coast. The area was originally inhabited by the Timucua people, and in 1564 was the site of the French colony of Fort Caroline, one of the earliest European settlements in what is now the continental United States. Under British rule, a settlement grew at the narrow point in the river where cattle crossed, known as Wacca Pilatka to the Seminole and the Cow Ford to the British. A platted town was established there in 1822, a year after the United States gained Spanish Florida; it was named after Andrew Jackson, the first military governor of the Florida Territory and seventh President of the United States.

Harbor improvements since the late 19th century have made Jacksonville a major military and civilian deep-water port. Its riverine location facilitates Naval Station Mayport, Naval Air Station Jacksonville, the U.S. Marine Corps Blount Island Command, and the Port of Jacksonville (JAXPORT), Florida's largest seaport by volume. Jacksonville's military bases and the nearby Naval Submarine Base Kings Bay form the third largest military presence in the United States. Significant factors in the local economy include services such as banking, insurance, healthcare and logistics. As with much of Florida, tourism is important to the Jacksonville area, particularly tourism related to golf with the PGA Tour headquarters located in nearby Ponte Vedra Beach. People from Jacksonville are known as Jacksonvillians and, informally, as Jaxsons or Jaxons (both derived from Jax, the shortened nickname for the city).

Tampa, Florida

Product for Tampa-St. Petersburg-Clearwater, FL (MSA)". fred.stlouisfed.org. "Look Up a Zip Code: TAMPA FL". U.S. Postal Service. Archived from the original

Tampa (TAM-p?) is a city on the Gulf Coast of the U.S. state of Florida. Tampa's borders include the north shore of Tampa Bay and the east shore of Old Tampa Bay. It is the third-most populous city in Florida,

thirteenth-most populous in the Southeast, and 49th-most populous city in the country with a population of 403,364 at the 2020 census, while the Tampa Bay metropolitan area at over 3.42 million residents is the second-largest metropolitan area in Florida and 17th-largest in the United States. The Greater Tampa Bay area has over 4 million residents and generally includes the Tampa and Sarasota metro areas.

Tampa was founded as a military center in the 19th century, with the establishment of Fort Brooke. The cigar industry was brought to Tampa by Vincente Martinez Ybor, after whom Ybor City is named. Tampa was reincorporated as a city in 1887 following the Civil War. Tampa's economy is driven by tourism, health care, finance, insurance, technology, construction, and the maritime industry. The bay's port is the largest in the state, responsible for over $15 billion in economic impact.

The city hosts a number of major employers, including Bloomin' Brands, WellCare, and Fortune 500 companies Crown Holdings and The Mosaic Company. Tampa's cultural landscape features the Tampa Museum of Art, Straz Center for the Performing Arts, and the historic Ybor City district, which reflects the city's Cuban and Spanish heritage. The city is also home to prominent educational institutions, including the University of South Florida and University of Tampa. The area's major league professional sports teams include the Tampa Bay Buccaneers (NFL), Tampa Bay Lightning (NHL), and Tampa Bay Rays (MLB).

Harley-Davidson FL

Harley-Davidson FL is a model designation used for Harley-Davidson motorcycles since 1941, when F referred to the new large capacity 74 cui (1200cc) variant

Harley-Davidson FL is a model designation used for Harley-Davidson motorcycles since 1941, when F referred to the new large capacity 74 cui (1200cc) variant of the V-2 Overhead valve engine (?Knucklehead?) that was introduced in 1936 as Model E with 61 cui (1000cc). The presence of an additional letter L indicated higher compression, offering more power but requiring higher octane leaded gasoline. In the early 1950s, the low compression version was discontinued, and in 1952 also the low capacity EL, making FL the basic model designation of Big Twin engines for decades to come.

Additional letters marked options, like FLS for sidecar use, with adjustable fork and reverse gear. As police departments were major customers of HD, FLE for escort and law enforcement was tuned down for better idling and low speeds in cities. FLF marked the traditional foot clutch and hand shift after the move to the safer hand operated clutch and foot shifting. With a higher powered FLH option since the late 1950s, many FL were FLH.

Until the 1970s, all Harley-Davidson bigtwin FL models came with a front wheel that had the same size as the rear wheel, 5.00-16, and with large fender and wide fork to match, often combined with fairing, bags and additional chrome accessories as ?full dresser?. Customers often slimmed down the factory FL to create a ?bobber? or even ?chopper?, removing the fender, the sheet metal and big head light, even adding slim 3.00-21 front wheels from other makes, or the whole fork of the smaller Harley-Davidson Sportster XL models that were introduced in 1957.

In 1971, the Harley-Davidson FX ?Super Glide? was introduced as a ?factory chopper?, combining the FL frame and drive train with the smaller XL front end, basically creating the third, intermediate model range FX that sold and sells well. Since then, the FL prefix indicates that the traditional 16-inch front wheel and big fenders are used on ?Dresser? Touring series or the traditional styling ?Heritage? variants of the Softail series, while FX is used on sportier models or the chopper-like Softails with rather thin front wheels.

FL (complexity)

In computational complexity theory, the complexity class FL is the set of function problems which can be solved by a deterministic Turing machine in a

In computational complexity theory, the complexity class FL is the set of function problems which can be solved by a deterministic Turing machine in a logarithmic amount of memory space. As in the definition of L, the machine reads its input from a read-only tape and writes its output to a write-only tape; the logarithmic space restriction applies only to the read/write working tape.

Loosely speaking, a function problem takes a complicated input and produces a (perhaps equally) complicated output. Function problems are distinguished from decision problems, which produce only Yes or No answers and corresponds to the set L of decision problems which can be solved in deterministic logspace. FL is a subset of FP, the set of function problems which can be solved in deterministic polynomial time.

FL is known to contain several natural problems, including arithmetic on numbers. Addition, subtraction and multiplication of two numbers are fairly simple, but achieving division is a far deeper problem which was open for decades.

Similarly one may define FNL, which has the same relation with NL as FNP has with NP.
