The crane kick is a fictionalized version of the Mae tobi geri (Japanese: ???) created by Darryl Vidal for the 1984 martial arts film *The Karate Kid*. The move involves the user adopting a one-legged karate stance before launching into a flying jumping kick with the standing leg. The movie's success caused the crane kick to become synonymous with karate in the United States and helped popularize the martial art in that country.

In the original film, the move is first performed by the character Mr. Miyagi, and witnessed by Daniel LaRusso, who is then taught the move. The move is more famously used in the final scene of the picture, in which Daniel uses the crane kick to defeat his arch rival Johnny Lawrence in a karate match. The move is

temporarily seen again in the sequel film, *The Karate Kid Part II*, as well as heavily referenced in the TV series *Cobra Kai*. In the latter, the kick is used by both Miguel Diaz and Johnny at various points as a way to mock Daniel, whilst Daniel himself uses it in the Season 5 finale to defeat Terry Silver. In the series finale, Daniel acknowledges that the kick had only worked against Johnny because Johnny ran right into it. While training Johnny for the Sekai Taikai final match, the two are shown practicing the crane kick on the beach. During his fight with Sensei Wolf -- which occurs in the same location that the match had taken place at in 1984 -- Johnny remembers Daniel defeating him with the crane kick and drops into a similar defensive stance, forgoing his usual strike first mentality. Similar to Daniel and Johnny's fight, this proves to be Wolf's undoing as Johnny is able to counter and defeat him when Wolf strikes first.

A squib kick is a term used in American football meaning a short, low, line drive kickoff that usually bounces around on the ground before it can be picked up by a member of the receiving team. The ball is kicked so short that it forces the receiving team's slower players to recover the ball first instead of their faster kick returner. Secondly, the unpredictably bouncing ball may be harder for the receiving team to pick up, allowing more time for kicking team members to get downfield to surround the ball carrier.
