ESL/EFL Cases

The format of the presentation of cases allows the reader to gain insights on teaching from the vantage point of the students' proficiency, the teacher's perspective, the writers' questions and suggested answers and finally the critical commentary. Readers are treated as thinking professionals who are capable of analysing the acts of language teaching through the teaching excerpts and the dynamic lesson transcriptions. The questions and critical commentary encourage deeper and more critical processing rather than a superficial interpretation of the teaching act. The cases, derived from authentic teaching contexts, encourage readers to appreciate the rich tapestry of teaching with all its complexities. This is a book about spirituality for the solitary, those people who live alone. In the past they were known as hermits, eremites, and anchorites; today they are known as pioneers, mountain men and women, widows, widowers, and people who choose to live alone in the country or in the city. They spend their days like other ordinary people taking care of daily chores, but also spending some time in prayer and meditation. The solitary life is alive and well, and it appears in all world religions. The solitary seeks solitude for prayer, meditation, self-awareness, and personal development. Living alone in a house or apartment begins to transform one's life; a person sets off on the path of purpose, the path of integrity, the path of transcendence that lifts his or her heart, mind, and spirit to the divine presence, God, who transforms more and more as the solitary dives deeper and deeper. This book provides an in-depth exploration of spirituality for the solitary along with eight-part exercises designed to further enhance solitary spirituality. Included are prayers, psalms in contemporary English, and celebrations using natural things, such as water, oil, and fire.

This book provides an introduction to fluid mechanics from a mainly physical point of view. It reflects modern research which explains the subject in terms of elementary physical concepts rather than mathematics.

Spirituality for the Solitary

This is a book about spirituality, more specifically, the spiritual journey. Before beginning any journey or trip—spiritual or otherwise—we experience a state of order. Then comes the call to journey, to travel, to take a trip, to walk, to pilgrimage, to hit the road, etc. The call to begin a journey may come from an urge within us; it may be an invitation from a spouse or a friend to fly somewhere; it may be as simple as taking the dog for a walk in the neighborhood, even taking different streets! The call disrupts our ordered lives. We prepare for our excursion. We enter into the stage of chaos when we take the journey; also, we enter into the process of transformation. By the time we get home, we will be transformed. These are the steps of the spiritual journey into God: order, hearing the call to journey, answering the call with preparation, entering the chaos of the journey, and being and coming home transformed. Ninety-seven reflections are presented in this book in seven chapters devoted to journey; road; path; route, highway, gateway; walk; way; and more.

Physical Hydrodynamics

This important new book bridges the gap between works on classical control and process control, and those dealing with HVAC control at a more elementary level, which generally adopt a qualitative and descriptive control. Both advanced level students and specialist practitioners will welcome the in-depth analytical treatment of the subject presented in this volume. Of particular significance are the current developments in adaptive control, robust control, artificial neural networks and fuzzy logic systems, all of which are given a thorough analytical treatment in the book. First book to provide an analytical treatment of subject Covers all new developments in HVAC control systems Looks at systems both in the UK and abroad

Journey into God

How will software development and operations have to change to meet the sustainability and green needs of the planet? And what does that imply for development organizations? In this eye-opening book, sustainable software advocates Anne Currie, Sarah Hsu, and Sara Bergman provide a unique overview of this topic—discussing everything from the likely evolution of national grids to the effect those changes will have on the day-to-day lives of developers. Ideal for everyone from new developers to CTOs, Building Green Software tackles the challenges involved and shows you how to build, host, and operate code in a way that's not only better for the planet but also cheaper and relatively low-risk for your business. Most hyperscale public cloud providers have already committed to net-zero IT operations by 2030. This book shows you how to get on board. You'll explore: How the energy transition is likely to change hosting on prem and in the cloud—and how your company can prepare The fundamental architectural principles of sustainable software development and how to apply them How to determine which parts of your system need to change The concept of extending hardware longevity and the part that software plays

Paul Virilio is one of the most significant and stimulating French cultural theorists writing today. Increasingly hailed as the 'archaeologist of the future', Virilio is noted for his proclamation that the logic of ever increasing acceleration lies at the heart of the organization and transformation of the contemporary world. The first book to afford a properly critical evaluation of Virilio's cultural theory, it includes an interview with Virilio; a recently translated example of his work; and a select bibliography of his writings. The commissioned contributions by leading cultural and social theorists examine Virilio's work from his early speculations on military and urban space to his current writings on dromology, politics, new communications technologies, disappearance, and the fallout from 'the information bomb'.

The history of Jews from the period of the Second Temple to the rise of Islam. From 'A History of the Mishnaic Law of Appointed Times, Part 1' This volume introduces the sources of Judaism in late antiquity to scholars in adjacent fields, such as the study of the Old and New Testaments, Ancient History, the ancient Near East, and the history of religion. In two volumes, leading American, Israeli, and European specialists in the history, literature, theology, and archaeology of Judaism offer factual answers to the two questions that the study of any religion in ancient times must raise. The first is, what are the sources -- written and in material culture -- that inform us about that religion? The second is, how have we to understand those sources in reconstructing the history of various Judaic systems in antiquity. The chapters set forth in simple statements, intelligible to non-specialists, the facts which the sources provide. Because of the nature of the subject and acute interest in it, the specialists also raise some questions particular to the study of Judaism, dealing with its historical relationship with nascent Christianity in New Testament times. The work forms the starting point for the study of all the principal questions concerning Judaism in late antiquity and sets forth the most current, critical results of scholarship.

How can teachers create a literacy curriculum that builds processing links between reading, writing, and spelling knowledge? In *Shaping Literate Minds: Developing Self Regulated Learners*, Linda J. Dorn and Carla Soffos illustrate how processing theory can be applied to the everyday practices of classroom teaching. If instruction emphasizes the interrelationships of these three language areas, students learn how to transfer knowledge, skills, and strategies across literacy events. This is complex theory, but the authors provide clear and practical examples to support teachers as they incorporate these ideas into their classroom practices. Grounded in authentic experiences from primary classrooms, this book provides: Explanations of processing behaviors among reading, writing, and spelling knowledge Observational tools that support teachers in noticing changes over time in specific literacy behaviors Guidance on creating conditions for developing self-regulated learners Authentic reading and writing samples and teacher/student interactions Figures and pictures that clearly describe how teachers can use assessment to inform and guide instruction, with links to national standards Details for establishing a school-based literacy model that includes team meetings, assessment walls, high standards, and a curriculum for literacy Appendixes with reproducible assessment checklists, report cards, task cards for literacy corners, and guided reading observation forms for team meetings With a national emphasis on accountability, high standards, and literacy achievement, *Shaping Literate Minds* will help teachers and administrators implement a high-quality literacy curriculum that links to national and state goals.

The book is designed to integrate the theory of foreign exchange rate determination and the practice of global finance in a single volume, which demonstrates how theory guides practice, and practice motivates theory, in this important area of scholarly work and commercial operation in an era when the global market has become increasingly integrated. The book presents all major subjects in international monetary theory, foreign exchange markets, international financial management and investment analysis. The book is relevant to real world problems in the sense that it provides guidance on how to solve policy issues as well as practical management tasks. This in turn helps the reader to gain an understanding of the theory and refines the framework. This new edition of the book incorporates two new chapters, together with - dating most chapters in the first edition, integrating new materials, data, and/or the recent developments in the areas. A new chapter on the portfolio balance approach to exchange rate determination is included, in addition to the major models - cluded in the first edition: the Mundell-Fleming model, the flexible price monetary model, the sticky price monetary model featured by the Dornbusch model and the real interest rate differential model. This makes the book inclusive in exchange rate theories. A second new chapter included is on issues in balance of payments or international transactions and their interactions with exchange rates, changes in exchange rates and exchange rate policies.

The advent of new neutron facilities and the improvement of existing sources and instruments world wide supply the biological community with many new opportunities in the areas of structural biology and biological physics. The present volume offers a clear description of the various neutron-scattering techniques currently being used to answer biologically relevant questions. Their utility is illustrated through examples by some of the leading researchers in the field of neutron scattering. This volume will be a reference for researchers and a step-by-step guide for young scientists entering the field and the advanced graduate student.

A History of the Mishnaic Law of Women, Part 1

This volume provides a detailed account of the practical use of Assessment for Learning (AfL) in primary language classrooms. It gives an in-depth account of the ways in which eight experienced primary language teachers incorporated this type of assessment into their practice and discusses the possible impact of AfL on primary language learning. Key themes discussed in the volume include the relationship between AfL and language learning in childhood, which assessment methods are appropriate for primary-aged language learners, which methods support learner agency and engagement in the learning processes, and possible paths for future action, with a focus on implementation and researching AfL in primary language contexts. The findings of this book are relevant to global contexts and it will be of interest to postgraduate students and researchers in the fields of language education, language assessment and teacher education, as well as to primary and language teachers and school leaders.

A History of the Mishnaic Law of Women, Part One

This series of practical guides is aimed at people starting or operating a food business. The third publication in the series covers markets for flours and bakery products, setting up a mill or a bakery, processing grains and flours and producing bakery products, quality assurance and legislation, and production and financial management. This book outlines the principles of eco-efficiency and presents case studies of their application from a number of international companies, including 3M and the Dow Chemical Company. The term "eco-efficiency" describes business activities that create economic value while reducing ecological impact and resource use. This book outlines the principles of eco-efficiency and presents case studies of their application from a number of international companies, including 3M and the Dow Chemical Company. It also discusses the value of partnerships--with other companies, business associations, communities, regulators, and environmental and other nongovernmental groups. In the conclusion, the authors argue that business must become more eco-efficient and that governments need to change the conditions under which business operates, including tax and regulatory regimes, to make them more conducive to eco-efficiency.

Shaping Literate Minds

Drawing on Actor-Network Theory (ANT) and its sibling notion of assemblage, this book offers a conceptual and methodological alternative to dominant social movement theory. The contributors explore empirical cases where science, technology, and activists intersect. They focus on the task of learning from the ways in which collectives assemble themselves around matters of concern, establish alliances with a number of human and non-human entities, and devise ways of caring for one another, or how they fail to meet these goals. They conclude that Actor-Network Theory is a useful tool in the construction of forms of attention and care that aspire to learn from social movements, rather than explaining them away. This book will be of interest to those studying activism and wider political and social movements, as well as those researching the

interactions between science, technology, and society more generally. It was originally published as a special issue of *Social Movement Studies*.

The Economics of Foreign Exchange and Global Finance

This second volume, edited and authored by world leading experts, gives a review of the principles, methods and techniques of important and emerging research topics and technologies in communications and radar engineering. With this reference source you will: - Quickly grasp a new area of research - Understand the underlying principles of a topic and its application - Ascertain how a topic relates to other areas and learn of the research issues yet to be resolved - Quick tutorial reviews of important and emerging topics of research in array and statistical signal processing - Presents core principles and shows their application - Reference content on core principles, technologies, algorithms and applications - Comprehensive references to journal articles and other literature on which to build further, more specific and detailed knowledge - Edited by leading people in the field who, through their reputation, have been able to commission experts to write on a particular topic

This volume contains original research and innovative analyses that deepen our understanding of figurative thought and language. The selected papers focus on the multi-faceted aspect of figuration, its function in thought, and its impact on areas of grammar and communication. Key topics explored include metaphor, metonymy and their relationship to each other, as well as the less studied figure of hyperbole and its relation to the fundamental figures of metaphor and metonymy. Collectively, the papers examine the pragmatic reasoning processes triggered by figurative thought, the lexicogrammatical motivations and/or constraints on figurative language, the impact of deeply entrenched figurative thought on the lexicon of natural languages, the cultural origins of figurative thought, and the psycholinguistic motivations for figuration. The comprehensive treatment of these issues is fundamental for future research on figurative thought and language, particularly on questions of universality vs. specificity of figuration, the impact of figuration on constructions, cross-linguistic comparisons of figurative language, and cognitive-pragmatic approaches to figurative meaning.

Inscription and Rebellion

The first work of any great historian has always commanded attention, and Tacitus was ancient Rome's very greatest historian. His biography of his father-in-law, governor of Britain in the years AD 77–84, is a literary masterpiece: it combines penetrating political history with gripping military narrative and throughout poses the question (still very much alive today) of how one should live one's life under a tyranny. This is the first commentary in English on the *Agricola* for almost half a century: in keeping with the aims of the series, particular attention is paid to the understanding of Tacitus' Latin, but a whole range of generic, historical, textual and narrative topics is covered, and it will be suitable for advanced undergraduates and graduate students as well as scholars. Tacitus' *Agricola* remains a key text for anyone with an interest in Roman Britain as well as ancient biography.

Neutron Scattering in Biology

This volume explores institutional and policy developments in the EU and its member states in a parallel examination of citizens' views of the effectiveness of crisis response reflected in public trust, output legitimacy, and satisfaction with democracy. Our approach to understanding the crisis posits EU-level governance and institutional change, national-level policymaking, and domestic politics as interrelated, interdependent domains of political action and public spheres that collectively shape the political landscape of post-crisis Europe. The volume sheds new light on the relationship among the institutional, policy, and polity consequences of the crisis. The book has two fundamental aims. The first is to demonstrate the

interconnected nature of European governance, domestic reform, and democratic politics. The unprecedented complexity of the financial, sovereign debt, economic, and social crises in Europe has led to a political crisis that reflects the struggle to effectively address its various causes and effects. The second objective is to present a theoretically informed assessment of the consequences of the European crises for state-society relations and democratic legitimacy. Our analysis of the crisis in a variety of national contexts and European governance highlights the difficulties faced by political decision-makers. We find that the domestic policy process is selectively affected or disconnected from the process of rule-making at the EU level, that public opinion still matters in the process of policy formation and EU crisis response, and that the salience of the EU agenda in the domestic public sphere increasingly depends on the preferences of political actors. Public response to the crisis has become increasingly complex as well, ranging from declining trust in the political institutions, emerging national stereotypes, changing expectations of the EU level of crisis response, growing disconnect between political parties and voters, and evolving intra-regional distinctions across the EU's east-west divide.

Directing the Decades is an examination of the development of theatre in the UK since the revolution of the 1950s until the present day, viewed through the individual progress of a female director from a working-class background. In this book, theatre history and lessons on directing are interwoven: the history is presented decade by decade, examining particular productions. Each historical theatre chapter is followed by a method chapter examining directorial influences and techniques predominant in each decade, as well as examining the working experience of the author in that decade. The book also includes practical advice on the directing process, including exercises, plans for rehearsals, and camera plans. Sue Dunderdale offers a unique perspective on the evolution of theatre directing in the UK, and her work, which served as the foundation of the creation of the Theatre Lab and Directing program at RADA, continues to influence working directors today. Directing the Decades will be of interest to students and practitioners of theatre directing, acting, and theatre history, and to theatregoers with a consciousness of class and how it impacts on our lives. The book also offers access to online transcripts of interviews with 16 practitioners, including Rufus Norris, Michelle Terry, Kwame Kwei-Armah, Indhu Rubasingham, Nadia Latif, and Nadia Fall.

Setting up and running a small flour mill or bakery

Throughout his career Mark Twain viewed the relations between the individual and his community with mixed feelings, and this book explores both the ambiguities of Twain's attitude and their effect upon his fiction. In the earlier novels—most notably *The Adventures of Tom Sawyer* and *Huckleberry Finn*—the protagonist enjoys a dual position—at liberty to follow his own inclinations while retaining his conventional place as a respected member of the community—and the resolutions of these works are built upon this duality. Facing realities which the earlier fiction evaded, Twain in *A Connecticut Yankee in King Arthur's Court* found himself in a dilemma that he was unable to resolve: the community was no longer seen as a moral refuge and, most importantly, the individual was no longer seen as superior to the community standards against which he revolted. Thomas Blues contends that Twain's failure to reconcile this opposition largely accounts for the bitter, cynical fiction at the close of his career, and through use of the individual-community relationship he offers here fresh interpretations of Twain's most widely read novels.

Books 1 and 2 of Tacitus' Annals were edited and annotated in two earlier volumes of this series (1972 and 1981) by the late F. R. D. Goodyear. Now A. J. Woodman and R. H. Martin have added a third volume: Book 3 of the Annals. This book covers the years AD 20-22, including the aftermath of Germanicus' death and the trial of his alleged murderer Calpurnius Piso and contains some of Tacitus' most well known and important programmatic and reflective passages. In their commentary the editors are the first to attempt a systematic comparison of the documentary record provided by a recently discovered senatus consultum relating to Piso's trial with Tacitus' narrative of the same episode. More attention is given to literary matters than by Goodyear but textual, linguistic and historical issues are treated fully and new interpretations frequently offered.

Reassembling Activism, Activating Assemblages

Defying the mafia with everyday acts of resistance For more than 150 years, Italy has been home to a resilient and evolving resistance against the pervasive influence of mafias. While these criminal organizations are renowned for their vast international business enterprises, the collective actions taken to oppose them are less known. In *Opposition by Imitation*, Christina Jerne explores anti-mafia activism, revealing how ordinary people resist, counter, and prevent criminal economies from proliferating. Drawing on ethnographic fieldwork among anti-mafia alliances in Campania, Sicily, and other parts of Italy, Jerne details a particular aspect of mafia activities: providing cash relief and other forms of patronage to individuals and groups. Her research shows how activism has evolved to imitate this sustaining role. Activists are increasingly challenging mafia control both by creating alternative economies—from producing food that interrupts mafia labor practices to organizing tourism that supports anti-mafia hospitality—and by subversively adopting business tactics similar to the mafia's to compete with their social influence and legitimacy. Exposing the political implications of this mimetic opposition, Jerne points to its potential impact on crime prevention and criminalization, both in Italy and globally. *Opposition by Imitation* shows how these modern-day Robin Hoods are redefining collective action, taking what was controlled by the mafias and returning it to the collective. This contentious economic turn, against the backdrop of broader social movements, reveals significant political possibilities afforded by imitative opposition.
