

What Successful People Know About Leadership: Advice From America's

Leadership

or myths, concerning leadership interfere with people's conception of what leadership is about. According to some, leadership is determined by distinctive

Leadership, is defined as the ability of an individual, group, or organization to "lead", influence, or guide other individuals, teams, or organizations.

"Leadership" is a contested term. Specialist literature debates various viewpoints on the concept, sometimes contrasting Eastern and Western approaches to leadership, and also (within the West) North American versus European approaches.

Some U.S. academic environments define leadership as "a process of social influence in which a person can enlist the aid and support of others in the accomplishment of a common and ethical task". In other words, leadership is an influential power-relationship in which the power of one party (the "leader") promotes movement/change in others (the "followers"). Some have challenged the more traditional managerial views of leadership (which portray leadership as something possessed or owned by one individual due to their role or authority), and instead advocate the complex nature of leadership which is found at all levels of institutions, both within formal and informal roles.

Studies of leadership have produced theories involving (for example) traits, situational interaction, function, behavior, power, vision, values, charisma, and intelligence, among others.

Communication and leadership during change

capacity to be effective in leadership roles and processes". The two central elements to this are leadership can be learned, people do learn, grow, and change

Communication and leadership during change encompasses topics of communication (transmission of information) and leadership (influence or guidance) during change. The goal of leader development is "the expansion of the person's capacity to be effective in leadership roles and processes". The two central elements to this are leadership can be learned, people do learn, grow, and change, and that leader development helps to make a person effective in a variety of formal and informal leadership roles.

Leader development promotes personal growth by helping individuals develop their abilities to manage themselves, to work effectively with others, and to ensure that the work gets done. Leadership development promotes organizational growth, helping the group as a whole develop the leaders it needs to carry out such tasks, such as securing the commitment of members and setting direction.

Establishing connections between people who can help achieve someone's goals will increase your chances of emerging as a leader in an organizational context. A great deal of a leader's development happens internally.

8, 2024). *“What is Project 2025? What to know about the conservative blueprint for a second Trump administration”*. CBS News. Archived from the original

Project 2025 (also known as the 2025 Presidential Transition Project) is a political initiative, published in April 2023 by the Heritage Foundation, to reshape the federal government of the United States and consolidate executive power in favor of right-wing policies. It constitutes a policy document that suggests specific changes to the federal government, a personal database for recommending vetting loyal staff in the federal government, and a set of secret executive orders to implement the policies.

The project's policy document *Mandate for Leadership* calls for the replacement of merit-based federal civil service workers by people loyal to Trump and for taking partisan control of key government agencies, including the Department of Justice (DOJ), Federal Bureau of Investigation (FBI), Department of Commerce (DOC), and Federal Trade Commission (FTC). Other agencies, including the Department of Homeland Security (DHS) and the Department of Education (ED), would be dismantled. It calls for reducing environmental regulations to favor fossil fuels and proposes making the National Institutes of Health (NIH) less independent while defunding its stem cell research. The blueprint seeks to reduce taxes on corporations, institute a flat income tax on individuals, cut Medicare and Medicaid, and reverse as many of President Joe Biden's policies as possible. It proposes banning pornography, removing legal protections against anti-LGBT discrimination, and ending diversity, equity, and inclusion (DEI) programs while having the DOJ prosecute anti-white racism instead. The project recommends the arrest, detention, and mass deportation of undocumented immigrants, and deploying the U.S. Armed Forces for domestic law enforcement. The plan also proposes enacting laws supported by the Christian right, such as criminalizing those who send and receive abortion and birth control medications and eliminating coverage of emergency contraception.

Project 2025 is based on a controversial interpretation of unitary executive theory according to which the executive branch is under the President's complete control. The project's proponents say it would dismantle a bureaucracy that is unaccountable and mostly liberal. Critics have called it an authoritarian, Christian nationalist plan that would steer the U.S. toward autocracy. Some legal experts say it would undermine the rule of law, separation of powers, separation of church and state, and civil liberties.

Most of Project 2025's contributors worked in either Trump's first administration (2017–2021) or his 2024 election campaign. Several Trump campaign officials maintained contact with Project 2025, seeing its goals as aligned with their Agenda 47 program. Trump later attempted to distance himself from the plan. After he won the 2024 election, he nominated several of the plan's architects and supporters to positions in his second administration. Four days into his second term, analysis by Time found that nearly two-thirds of Trump's executive actions “mirror or partially mirror” proposals from Project 2025.

Followership

Africa, Australia and the Native Peoples of North and South America. The best known advice from ancient philosophers came from Aristotle who believed, “He

Followership are the actions of someone in a subordinate role. It may also be considered as particular services that can help the leader, a role within a hierarchical organization, a social construct that is integral to the leadership process, or the behaviors engaged in while interacting with leaders in an effort to meet organizational objectives. As such, followership is best defined as an intentional practice on the part of the subordinate to enhance the synergetic interchange between the follower and the leader.

In organizations, “leadership is not just done by the leader, and followership is not just done by followers.” This perspective suggests that leadership and followership do not operate on one continuum, with one decreasing while the other increases. Rather, each dimension exists as a discrete dimension, albeit with some shared competencies.

The study of followership is an emerging area within the leadership field that helps explain outcomes. Specifically, followers play important individual, relational, and collective roles in organizational failures and successes. "If leaders are to be credited with setting the vision for the department or organization and inspiring followers to action, then followers need to be credited with the work that is required to make the vision a reality."

The term follower can be used as a personality type, as a position in a hierarchy, as a role, or as a set of traits and behaviors. Studies of followership have produced various theories including trait, behavioral attributes, role, and constructionist theories in addition to exploring myths or misunderstandings about followership.

Joyce Brothers

including the 1981 book What Every Woman Should Know About Men and the 1991 book Widowed, inspired by the loss of her husband. Her advice was used as a source

Joyce Diane Bauer Brothers (October 20, 1927 – May 13, 2013) was an American psychologist, television personality, advice columnist, and writer.

In 1955, she won the top prize on the American game show The \$64,000 Question. Her fame from the game show allowed her to go on to host various advice columns and television shows, which established her as a pioneer in the field of "pop (popular) psychology".

Brothers is often credited as the first to normalize psychological concepts to the American mainstream. Her syndicated columns were featured in newspapers and magazines, including a monthly column for Good Housekeeping, in which she contributed for nearly 40 years. As Brothers quickly became the "face of psychology" for American audiences, she appeared in numerous television roles, usually as herself. From the 1970s onward, she also began to accept fictional roles that mocked her "woman psychologist" persona. She is noted for working continuously for five decades across various platforms. Numerous groups recognized Brothers for her strong leadership as a woman in the psychology field and for trying to end the stigma around mental health.

Computer-supported cooperative work

researcher Mark Ackerman calls this "divide between what we know we must support socially and what we can support technically"; the social-technical gap

Computer-supported cooperative work (CSCW) or computer-supported collaboration is the study of how people utilize technology collaboratively, often towards a shared goal. CSCW addresses how computer systems can support collaborative activity and coordination. More specifically, the field of CSCW seeks to analyze and draw connections between currently understood human psychological and social behaviors and available collaborative tools, or groupware. Often the goal of CSCW is to help promote and utilize technology in a collaborative way, and help create new tools to succeed in that goal. These parallels allow CSCW research to inform future design patterns or assist in the development of entirely new tools.

Computer supported cooperative work includes "all contexts in which technology is used to mediate human activities such as communication, coordination, cooperation, competition, entertainment, games, art, and music" (from CSCW 2023).

Lean In

seeks advice from people who have fresh perspectives rather than deep experience in an existing culture and how Howard Schultz was open about sharing

Lean In: Women, Work, and the Will to Lead is a 2013 book encouraging women to assert themselves at work and at home, co-written by business executive Sheryl Sandberg and media writer Nell Scovell.

America's Got Talent

competitions: America's Got Talent: The Champions (2019–20), AGT: Extreme (2022), America's Got Talent: All-Stars (2023), and America's Got Talent: Fantasy

America's Got Talent (often abbreviated as AGT) is an American talent show competition, and is part of the global Got Talent television franchise created by Simon Cowell. Produced by Fremantle USA and Syco Entertainment, it premiered on NBC on June 21, 2006, after plans for a British edition in 2005 were suspended, following a dispute within the British broadcaster ITV. Production would later resume in 2007, following the success of the first season. Each season is mainly run during the network's summer schedule, and has featured various hosts over the course of the program's history. The current host is Terry Crews.

The program attracts a variety of participants from across the United States and abroad, who possess some form of talents. Acts range from singing, dancing, comedy, magic, stunts, variety and other genres. Each participant or act who auditions, attempts to secure a place in the live episodes of a season, by impressing a panel of judges. The current line-up consists of Cowell, Howie Mandel, Mel B, and Sofia Vergara. Participants making it into the live episodes, compete against each other for both the judges' and public's vote, in order to reach the live final. The winner receives a large cash prize (primarily paid over a period of time), and since the third season, a chance to headline a show on the Las Vegas Strip.

The show itself has been a rating success for NBC, drawing in on average around 10 million viewers per season. In 2013, a book titled Inside AGT: The Untold Stories of America's Got Talent was released, providing a description of the seasons, contestants, judges and production techniques of the show. It includes detailed interviews with contestants from all seasons, up to the date of the book's publication.

The series has run for a total of nineteen seasons, with the nineteenth season airing May–September 2024, and has spawned four spin-off competitions: America's Got Talent: The Champions (2019–20), AGT: Extreme (2022), America's Got Talent: All-Stars (2023), and America's Got Talent: Fantasy League (2024). The main series premiered its twentieth season in May 2025 with host Crews and judges Cowell, Mandel, Vergara, and Mel B.

Founder mode

still know so little about founder mode. Look at what founders have achieved already, and yet they've achieved this against a headwind of bad advice. Prior

Founder mode is a term used and popularized by Y Combinator co-founder Paul Graham in a September 2024 essay in response to a talk delivered by Airbnb co-founder Brian Chesky. It describes a specific kind of leadership in which a founder has a direct, hands-on approach to their company rather than breaking up and delegating responsibility through a top-down structure. Often cited examples of leaders embodying founder mode include Steve Jobs, Elon Musk, and Jensen Huang.

Immediately after its online publication, Graham's essay led to widespread debate and discourse about the different methodologies regarding how to run a company, the pros and cons of micromanagement, and the nature of founder personalities versus that of non-founders, among other relevant concerns. It also spurred many memes, jokes, and stereotypes about the culture surrounding Silicon Valley and big tech.
