The Cambridge Handbook of English Corpus Linguistics (CHECL) surveys the breadth of corpus-based linguistic research on English, including chapters on collocations, phraseology, grammatical variation, historical change, and the description of registers and dialects. The most innovative aspects of the CHECL are its emphasis on critical discussion, its explicit evaluation of the state of the art in each sub-discipline, and the inclusion of empirical case studies. While each chapter includes a broad survey of previous research, the primary focus is on a detailed description of the most important corpus-based studies in this area, with discussion of what those studies found, and why they are important. Each chapter also includes a critical discussion of the corpus-based methods employed for research in this area, as well as an explicit summary of new findings and discoveries.

This volume provides an in-depth comparative study of translation practices and the role of the poet-translator across different countries and in so doing, demonstrates the need for poetry translation to be extended beyond close reading and situated in context. Drawing on a corpus composed of data from national library catalogues and Worldcat, the book examines translation practices of English-language, French-language, and Italian-language poet-translators through the lens of a broad sociological approach. Chapters 2 through 5 look at national poetic movements, literary markets, and the historical and socio-political contexts of translations, with Chapter 6 offering case studies of prominent and representative poet-translators from each tradition. A comprehensive set of appendices offers readers an opportunity to explore this data in greater detail. Taken together, the volume advocates for the need to study translation data against broader aesthetic, historical, and political trends and will be of particular interest to students and scholars in translation studies

and comparative literature.
